

Nelson-Jameson, Inc.

Your Testing Lab Repair / Service Center

Nelson-Jameson offers service and repair on many pieces of equipment used daily in your QA/QC and process area testing facilities. Serviced to factory specifications by qualified on-staff technicians, original equipment manufacturers, or qualified service centers, you can be assured of fast turn-around to keep your operation running efficiently. By taking advantage of this service, your company can realize substantial savings when compared to purchasing new equipment.

Service and repairs offered for the following:
