# Gloveworks® Nitrile Disposable Gloves

Feel the Difference

## INTRODUCTION

Try on Gloveworks® Nitrile Disposable Gloves with Raised Diamond Texture (RDT), and right away you will feel they are special. Why?

It is not because they require dedicated production lines and unique hand-shaped formers to achieve exceptional performance. Nor is it the fact that they deliver **outstanding barrier protection** against chemicals as well as added puncture resistance. They are, after all, more than double the thickness of standard nitrile gloves.

What you will feel is something much more tangible: the amazing grip, comfort, and protection of heavy-duty 8-mil nitrile, and confidence that these gloves **can get the job done.**

The pronounced texture is the real game changer. Raised Diamond Texture creates **60% more surface area** to better channel away liquids for added gripping power—all users immediately can tell the difference, and always comment on it.

As one would expect from nitrile, the gloves offer tremendous fit and feel, first-rate tactile sensitivity, and **superior comfort.** Additionally, the Raised Diamond Texture, reversed on the inside of the gloves, allows air to circulate, keeping hands cooler longer. Nitrile gloves contain no organic latex to avoid aggravating allergies, and are powder free to prevent damaging a perfect finish or adhesive bond.

**Not all disposable gloves are created equal.** Raised Diamond Texture Nitrile Disposable Gloves raise the bar for hand protection in multiple industries.

**30K+** Reviews of Gloveworks With Raised Diamond Texture reveal these gloves to be a significant force across multiple industries and applications, as well as a great value.

From automotive to food processing, jan/san to safety, they always get the job done.

Difficult to find during the pandemic due to special production requirements, "the orange gloves" are back and ready to do the job for you.

Have you tried them yet? If not, what are you waiting for?

# OUTSTANDING PERFORMANCE

Online, they are a top-rated industrial glove in the Disposable Gloves, Industrial, and Occupational Health & Safety Product categories.

Once customers try these gloves on, they will not wear anything else. Why do users rate these gloves so highly? It's simple:

- ◆ Unmatched grip that users can feel immediately
- ◆ Strength and durability to stand up to the toughest jobs
- ◆ Outstanding value—these gloves put you in control of when and how you use them

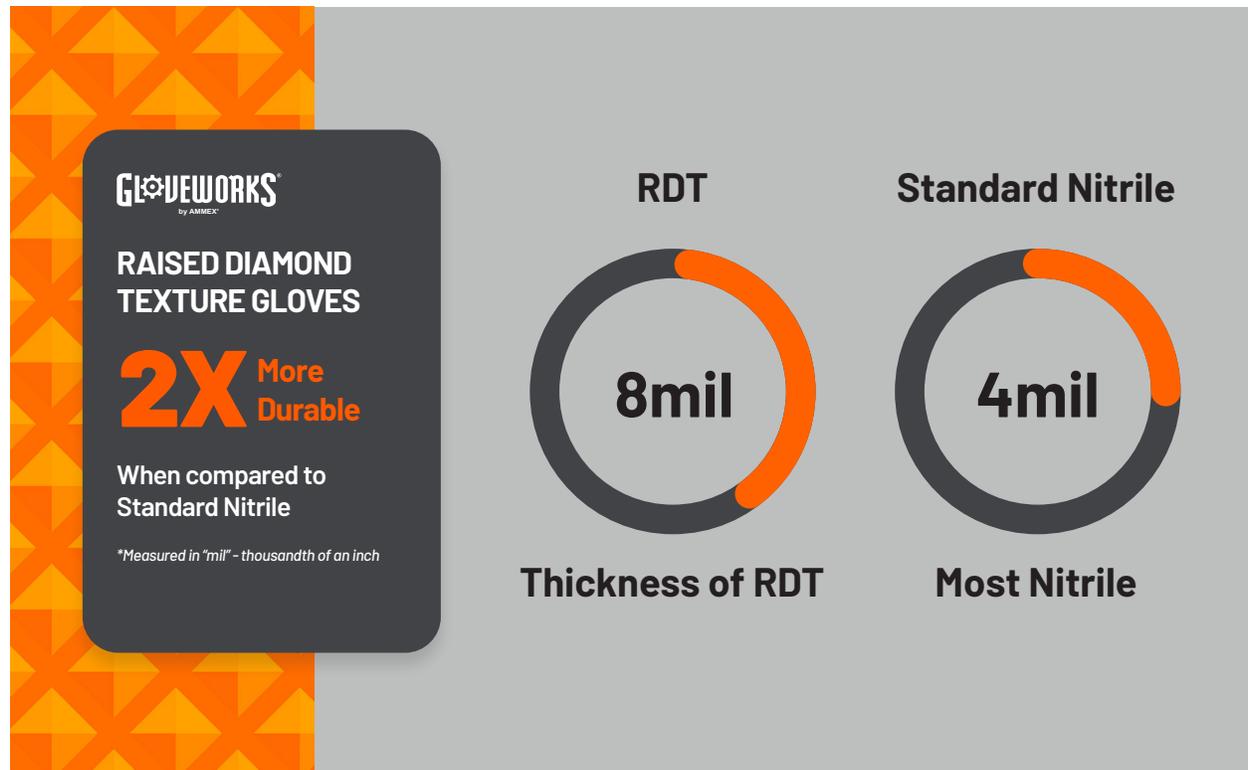

We can talk about the grip, durability, and value of RDT all day. But don't just take our word for it!

Pull them on. Feel the nitrile hug the contour of your hands. That 8-mil thickness just feels substantial, doesn't it?

Pick up a hammer, or a screwdriver. You know you won't let it slip—after all, it's Raised Diamond Texture.

**Try the RDT Difference. Experience the performance for yourself.**

**#1** Gloveworks® gloves with Raised Diamond Texture are the best-selling industrial disposable glove across a wide spectrum of applications.

## SUPERIOR GRIP

Grip is the trademark of Raised Diamond Texture disposable gloves. They offer 60% more surface area to better channel away liquids—even slippery substances like grease and oil—so even when the glove is wet, the user can hold on tight. That means **a firm grip on tools and machinery at all times.**

Other glove textures can claim they deliver a firm grip, but let's be clear: When micro-roughened or regular-textured gloves get wet, they can become slick.

You can feel the difference of Raised Diamond Texture as soon as you put the gloves on. Users are often surprised at the immediacy of the grip and say these are the best gloves they have ever worn. Raised Diamond Texture will forever change how you feel about disposable gloves.

**60% more surface area:** Diamonds channel away liquids, so no worries about losing control of tools. Plus, reverse texture on the inside helps air circulate to keep your hands drier.

### What customers are saying:

★★★★★

"These gloves are what I use daily as a plumber. They are the **best in terms of grip**, and ease of ingress and egress."—Marc Rhodes

★★★★★

"I use these in my specialty cleaning business. We clean tile and grout, often in restaurant kitchens. This is dirty work that's rough on my hands. I'm very pleased with these gloves—the diamond pattern gives **a strong grip** on the tools I'm using."—S. Ayers

★★★★★

"These gloves are fantastic! When you're working on your truck or motorcycle and you need grip while your fingers are oily and greasy, **these are the gloves for you.** I have used some pairs multiple times because I can wash them just the same as washing my hands."—B.Z.

★★★★★

"I first discovered these gloves while working with a drilling company. I'm a geologist and needed gloves while logging saturated cuttings. The driller gave me a pair and **I really was impressed with the textured grip of the gloves.** They withstand oil, grease, gasoline, and brake/carb cleaner."—Scott L. Neville

★★★★★

"I wear them for cooking, cleaning, painting, washing my car, working on electronics. The texture helps you **get a better grip** on items and is just the right thickness to provide protection yet still allow for flexibility."—W.C.

★★★★★

"My favorite woodworking gloves. They have grip to them, perfect for handling wood, and are thick enough so they don't rip. The ring around the cuff also doesn't rip easily, which is a problem with some other nitrile gloves. These gloves also do **a good job of protecting** against basic solvents, such as mineral spirits."—RDT Customer

★★★★★

"These are the perfect gloves if you are looking for something between those cheapie, thin wrist-type gloves and a heavy-duty, arm-length glove. The diamond pattern on both sides is a **definite plus for good gripping.**"—Wadiefong

★★★★★

"These are outstanding for working around the house. They keep my hands clean and dry; on top of that, they have textured grip that is extremely helpful, especially when the gloves are wet. They really are **the best of all worlds.**"—Joel

## DURABILITY & STRENGTH

Industrial applications—those that involve chemicals and machinery—require gloves that last. They need to resist rips, tears, and punctures while still delivering the level of hand protection that users depend upon. Gloveworks® with Raised Diamond Texture are **more than twice as thick** as standard nitrile to stay strong through multiple tasks—so strong that many users choose to reuse them.

Premium nitrile, a top-quality manufacturing process with 100+ quality inspections, and 8-mil thickness all ensure that the gloves will stand up to tough tasks and deliver top-notch performance.

Want to see for yourself? Pull on a pair of Gloveworks with RDT and dip your hands into a can of gasoline. Smells bad, doesn't it? A little nerve-racking, being so momentarily flammable? But shake off the excess, pull off the gloves, and you'll see how well protected your hands are with Gloveworks.

**8-mil** thickness means greater resistance to punctures, rips, and tears, and provides for extended-duration use. They feature extra protection from grease, gasoline, pesticides, cleaning solutions, and a long list of specialty chemicals. In addition, in the case of orange and green, the high-visibility color really demands to be seen, especially in dark environments.

### What customers are saying:

★★★★★

"I bought these with the intention of using a new pair daily. I was amazed that despite fairly hard use, the gloves remained intact. I turn them inside-out to dry overnight, and then turn them back the next morning. I typically get at least **two days' use from a pair.**"  
—Call Them As I See Them

★★★★★

"I have been messing around with nitrile gloves forever, looking for exactly the ones I will stick with for good. I must have purchased 100 different so-called 'heavy-duty' nitrile gloves, and they never stood up to the work. These orange ones are **strong and comfortable.**"—F.H.

★★★★★

"I'm an auto mechanic and I wear these every day. They are the best glove for what I do, and I've tried many. Their durability makes them a **better value** than cheaper gloves."—Shane W.

★★★★★

"These gloves are durable and perfect for the shop mechanic working with tools, bolts, grease, and messy stuff. We blasted through my other gloves in one day, so I was looking for more durable gloves when I found these. **They hit the mark!**"—James

★★★★★

"The texture greatly improves grip, and the thickness makes them more durable. **Good value** because you won't tear them as easily as thinner, cheaper gloves—which means you don't use as many."—Tad Burkhart

★★★★★

"After more than a week of wear, I am still on my first pair of these marvelous gloves. The 8-mil thickness is tough, and yet tactile sense is not impaired. In fact, the textured surface allows delicate manipulation of fine instruments that is lacking in smoother gloves. If it were possible to give 6 stars, I would do so. They are **still going strong.**"—B.E. Sharrow

★★★★★

"Great value for the money. **I will buy these all the time now.** Great for working under the hood, cleaning the house, and more. Very impressed."—R.W.

★★★★★

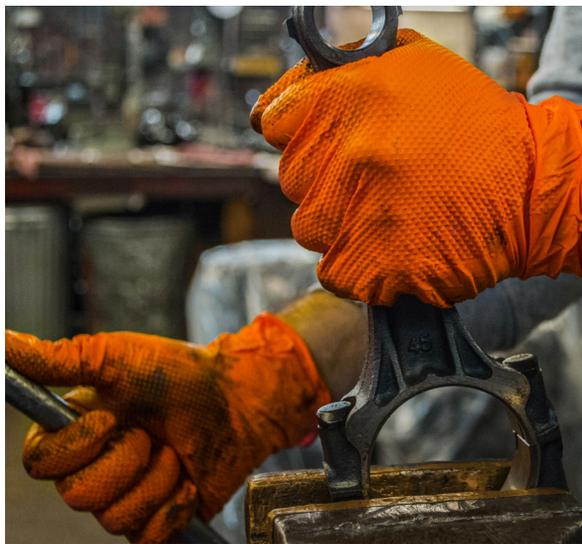

"I really like these gloves. They are **strong enough to reuse** several times. They haven't ripped on me yet."  
—Ty in California

## UNMATCHED VALUE

Raised Diamond Texture gloves provide a perfect combination of performance, durability, and price. In other words—outstanding value. Why use four or five pairs of thinner, cheaper gloves for a heavy-duty task? One pair of Gloveworks® nitrile with RDT can handle most jobs.

**Gloves with Raised Diamond Texture put you in control** of your glove changes—they don't control you! Save time and money, all while enjoying the enhanced protection and performance.

RDT gloves offer the perfect choice for most jobs and applications, across various industrials. Don't try to save money on thinner, cheaper gloves, because rips, tears, and frequent glove changes will cost you more.

**3X** the puncture resistance of latex, with greater protection from chemicals. RDT gloves offer fit, feel, and comfort to rival natural rubber latex—without concerns for aggravating allergies. Raised Diamond Texture will change the way you feel about disposable gloves, literally.

### What customers are saying:

★★★★★

"These last me a long time while I'm working on my cars. **They are way more durable than others I've tried.**"  
—D.G.

★★★★★

"This product has **held up for long hours** of painting and auto repair work. A great value—I will buy this product again."—S.U.

★★★★★

"Absolutely amazing. I use them for gardening, cleaning, construction—everything. I can put them under heavy gloves so my hands stay totally clean. They are **thick and durable. Recommend 10,000%!**"  
—Michael Bialecki

★★★★★

"These are **extremely durable**. I work on outboard motors, and they are usually oily, greasy, and gassy. A little carb cleaner and a rag, and these gloves clean up and can be reused multiple times."—Brandon

★★★★★

"If I could give these gloves 10 stars, I would! I'm a private chef and work 8-10 days with these gloves. My hands are constantly in water, chopping vegetables, fruits, meats, etc., and **one pair lasts over a week!** I don't ever want to be without them! They're so durable, one box will last me a long time."  
—Lisa Rush

★★★★★

"These gloves are fantastic in every way, and they are **an absolute godsend for mechanics**. I can't praise the durability of these gloves enough. They are powder free, soft on your hands, fit well, never rip, and still allow you to have a very good tactile feel of what you're working on while maintaining a solid grasp."—A. Silva

★★★★★

"These gloves are awesome. My shop at work started buying these, and I loved them so much I ordered my own to wear while working on my rigs at home. They have the **strength and durability** of a 9-mil glove, but it feels like you're wearing a 5-mil. One pair of gloves will last me a couple of days of hard work."  
—Capnswanny

★★★★★

"I am using these at work in a grocery store and spend roughly **7 to 10 hours a day** stocking product. I've had only one tear, and it was after lifting boxes for four hours straight. After that I spend several hours on the cash register, and the texture on these is great for counting money."—C.A.

## CONCLUSION

Gloveworks® with RDT is **not just another disposable glove**. The high-end performance it delivers is real. It is top of the line, designed and manufactured for pros who need the best performance.

These gloves put you in control. You decide when you need a fresh glove—they don't force your hand. Try Gloveworks® with Raised Diamond Texture today. They will change the way you feel about industrial disposable gloves.

Are Raised Diamond Texture nitrile gloves a part of your toolbox? If not, what are you waiting for? You are missing out on many benefits:

- ◆ Get an unbeatable grip with 60% more surface area to channel away liquids
- ◆ Durability and Strength, as premium, 8-mil nitrile is 3x more puncture resistant than latex
- ◆ Keep hands drier and cooler with reverse texture on the inside to help air circulate
- ◆ Excellent fit, feel, dexterity, comfort, and tactile sensitivity for tough but delicate work
- ◆ Best value for all types of applications, including food contact
