Boot Scrubbers

BSX Boot Scrubber™ Series

Each of the BSX Boot Scrubbers use an open, sanitary design which eliminates hidden and hard-to-reach areas that are difficult to clean and can harbor pathogens. Components of each unit can be easily removed for cleaning and inspection. Because it's durable, you can clean and rinse just like any other piece of equipment in your facility.

All units are constructed of solid 304 stainless steel with no hollow parts or painted surfaces to chip or flake. Tool-free brush removal provides fast and easy cleaning. Polypropylene brushes are compatible with most chemicals and are replaceable. Select units utilize venturi injectors to dilute the chemical and apply onto brushes and transferred to boots. Chemicals sold separately.

Manual Boot Scrubber Units

Simply move boot back and forth through the brushes to supply the mechanical scrubbing action. Ideal for low-traffic areas and facilities with limited space. Wet or dry units available. With the wet unit, the system is activated when a user steps onto the platform then the cleaning solution is sprayed onto the boot and brushes.

- 1 user at a time; BSX100: 2 to 6 users per minute, BSX200: 3 to 10 users per minute.
- Wet connection requirements: 3/8" NPTF cold water connection, 50 psi recommended.
- Dimensions; BSX100: 29"L x 16"W x 44"H. BSX200: 30"L x 30"W x 43"H.

Footwear Sanitizing Units

HACCP SmartStep™ Footwear Sanitizing System

Reduce cross-contamination from footwear anywhere in your facility with the HACCP SmartStep Footwear Sanitizing Station and the effectiveness of Alpet® D2 or Alpet® D2 Quat-Free Surface Sanitizer. The versatility of the SmartStep stations allow you to set-up multiple units in high-traffic areas or add units as your plant's needs grow. Alpet® D2 and Alpet® D2 Quat-Free 5-gallon pack sold separately.

HACCP SmartStep™ Sanitizing Stations

Foot-operated unit uses compressed air to deliver an atomized spray of Alpet® D2 or Alpet® D2 Quat-Free onto footwear soles. Sanitizing unit is available with or without handle. Handle mounts to the floor to provide a safe and secure handhold when in use.

Stock #	Description	Unit
764-2441	Sanitizing Station without Handle	EA
764-2442	Sanitizing Station with Handle	EA

Boot Scrubber

Bolts to the floor to ensure a safe and secure handhold while manually cleaning footwear. Removable tray collects debris, keeping the area clean, and reducing potential contaminations. Brushes are replaceable.

Stock #	Unit
764-2444	EA

Sanitizing Station with Boot Scrubber and Handle

Combine the HACCP SmartStep™ Footwear Sanitizing Station and Boot Scrubber for the complete package! Same benefits as the units listed above.

764-2441

764-2444

764-2443

HACCP SmartStep2™ Walk-Through Dual Footwear Sanitizing Unit

Effective for reducing cross-contamination in wet or dry facilities. This foot-operated unit uses compressed air to deliver an atomized spray of Alpet® D2 or Alpet® D2 Quat-Free Surface Sanitizer. Each uses only 0.4-oz of chemical (0.2-oz per boot), yet provides ample coverage to footwear soles. Alpet D2 or Alpet D2 Quat-Free 5-gallon pack sold separately.

Stock #	Unit
764-2029	EA

764-2029

HACCP Defender™ Footwear Sanitizing Station

A one-way, walk-through design supports traffic flow while controlling pathogens and reducing cross-contamination. An atomized spray provides ample coverage to boot soles, which reduces chemical waste and controls moisture. Adjustable output for optimal volume control with infrared sensor doors and sprayers. Alpet® D2 or Alpet® D2 Quat-Free 5-gallon pack sold separately.

Doorway Foamers

Lafferty Doorway Foamers

Timed entryway foam sanitizers are automated foam applicators for projecting sanitizing chemicals on to floors to help prevent cross-contamination. 120-Volt units operate on compressed air and city water pressure (35 to 125 psi) to draw and blend chemical concentrate into the water stream to create an accurately diluted solution. Rich, clinging foam is created by injecting compressed air into the solution to greatly increase volume and coverage ability. Foam is then projected through the discharge hoses and Spreader™ nozzles. The system timer is user-programmable to meet the needs of any facility. Includes foamer body, hose, nozzles, metering tips, and NEMA rated control box.

Stock #	Description	Compressed Air Requirement
385-8024	For Single 3' Entryway	Up to 3 CFM
385-6476	For Dual Adjacent 3' Entryways	Up to 4 CFM
385-6420	For 8' to 16' Wide Overhead Doorways	Up to 5 CFM

Foam-iT™ Single Doorway Foamer

120-Volt, air operated (40 to 80 psi) doorway foamer that draws from a pre-mixed chemical solution and covers a 9' x 4' area with a flow rate of 2-gallons/minute. Requires 10 to 100 psi water. Operates using a repeat cycle timer and includes complete foam unit, single-line foam nozzle with spray tip, mounting hardware for control box and nozzle, and a 10' discharge tubing for nozzle.

Stock #	Description	Compressed Air Requirement

Pathogen & Micro Testing

Microorganism Detection

Hygiena's MicroSnap™ platform bridges the time gap between ATP and bacterial culture results with convenient, same-shift test results for E.coli, Coliform, Enterobacteriaceae, and TVC. MicroSnap tests are read by the EnSURE™ monitoring system and results are recorded with SureTrend™ software. EnSURE measures both ATP and organism tests, enabling food and beverage processors to acquire an accurate status of plant hygiene and product quality during the same working day or shift. Knowing test results sooner prevents recalls, reduces waste, shortens hold time, and enables a quicker response when contamination issues arise. Powered by (2) AA batteries, sold separately.

Hygiena™ InSite™ Listeria Environmental Test

A quick and easy in-house test at an economical price. Designed to monitor the presence of common Listeria spp (L.innocua, L.ivanovii, L.welshmeri, L.monocytogenes) in environmental samples from food processing areas. This test indicates the presence of Listeria species without confirming pathogenic organisms. A color change from yellow to light brown/black in as little as 24 hours is considered presumptive positive. An incubator is required, sold separately.

Stock #	Packaging	Unit
332-3118	50/bx	BX
332-3107	100/ca	CA

Hygiena™ InSite™ Salmonella Environmental Test

A quick and easy test for the detection of Salmonella species (spp) in food processing environments. Contains a liquid medium formulated with selective growth enhancers and chromogenic compounds. A color change from purple to bright yellow in 24 to 48 hours is presumptive positive for Salmonella spp. InSite Salmonella is a self-contained screening test which is easy to perform while reducing wait time, labor costs, and materials. An incubator is required, sold separately.

Stock #	Packaging	Unit
332-3120	50/bx	BX

3M™ Petrifilm™ Environmental Listeria Count Plates (EL)

Designed to detect Listeria species from environmental samples and to increase the efficiency of monitoring plant sanitation. This count plate is a sample-ready culture medium containing selective agents, nutrients, a cold water-soluble gelling agent, and a chromogenic indicator. Requires a spreader (460-3498) sold separately.

- Facilitates the detection of the majority of environmental Listeria.
- Results within 29 hours.

460-3448	200/ca	CA

3M™ Clean-Trace™ Hygiene Monitoring & Management System

Provides you with quick, accurate results by measuring the effectiveness of your cleaning and sanitation programs. The powerful and flexible software has a redesigned dashboard, making it easy to collect, store, and retrieve test result reports. It turns your data into information to help you identify root causes and take corrective actions quickly. The new, convenient wireless and networking capabilities also enable you to download photos to the luminometer.

Features of Luminometer:

- Stands up to harsh manufacturing environments.
- Durable, impact resistant casing.
- User-friendly touch screen.
- Flip-out foot allows device to stand upright.
- Ergonomic design allows for one-handed operation, regardless of hand size.
- Self-diagnostic check on start-up.
- Secure data cannot be changed on hardware.

Features of Software:

- Redesigned dashboard consolidates information.
- Common tasks—1 click access to key features.
- Easily randomize test point in sample plans.
- Simplified data displays help you make more educated decisions.
- Confidently identify trouble spots to improve cleaning and reduce downtime for faster production start-up.
- Convenient, audit ready reports.

Hygiena™ EnSURE™ Touch Luminometer

Provides rapid and accurate sanitation verification to support your FSMA program. Featuring a 5" touch screen, wireless sync technology, and cloud-based software, the EnSURE Touch is designed to adapt to your workplace and provides the data you need for complex multi-location operations, audit and risk management, and recall prevention.

Can help you:

- Verify sanitation of surfaces, liquids, and product testing in as little as 10 seconds.
- Test and compare the effectiveness of sanitation products and procedures.
- Train and monitor sanitation crew and QC/QA employees.
- Support SSOP and objectively prove cleaning standards have been met.
- Quickly identify when replaceable parts like belts and brushes should be replaced.
- Identify problem areas in your facility that need more attention.
- Provide on-the-spot training and feedback.

In order to:

- Meet FSMA, GFSI, and ISO standards.
- Protect your brand reputation.
- Avoid financially damaging lawsuits.
- Reduce risk of food poisoning, facility closure, and product recalls.
- Lower facility testing costs by bringing testing in-house.
- Provide evidence of due diligence—HACCP.

351-3301	10 mL Neutralizing Buffer w/ 2 Gloves	100/ca	CA
351-3306	10 mL Neutralizing Buffer w/ 24-oz Bag and 2 Gloves	100/ca	CA

Labplas Sani-Stick

Features a red, pliable handle making it possible to sample those hard-to-reach areas in your plant. The unique design of the handle makes it an added bonus to use; just pinch the handle and it releases the sponge into the 24-oz TWIRL-EM® bag. No need for refrigeration.

Stock #	Description	Packaging	Unit
467-3140	Sani-Stick with Lethen broth	100/ca	CA

NASCO Sponge Pole

Perfect for sampling procedures that require testing surfaces that are difficult to reach such as window ledges, light fixtures, air vent ducts, etc. The adjustable aluminum pole is 6' long and extends to 10'. Includes pack of 10 sterile sponges.

Stock #	Unit
486-3457	EA

Whirl-Pak® Sponge Probe

Works well for those hard-to-reach areas as the sponge adheres to a holder that is screwed onto the handle. Both the sponge and handle are sterile, and the polypropylene sponge and handle fit inside the 24-oz write-on Whirl-Pak® bag. To use, add buffer (sold separately) of your choice to the bag to hydrate sponge. Once sampling is complete, simply insert the sponge back into the bag, unscrew the handle and discard, close and send into the lab for testing.

Stock #	Packaging	Unit
486-3076	50/bx	BX

Whirl-Pak® Spec-Sponge® Bags

Designed for environmental surface sampling, work areas, equipment, animal carcasses, and any other place where testing for Listeria, Salmonella, E.coli, and other foodborne pathogens is required. The pre-moistened sponges contain neutralizing buffer with sodium thiosulfate to neutralize residual chlorine sanitizer, or you can choose bags without buffer and add letheen broth diluent (443-3002). To use, simply open the 18-oz bag, moisten the sponge, wipe surface to obtain sample, then reseal bag, and send to the laboratory.

Stock #	Description	Packaging	Unit
486-3189	Speci-Sponge® Bags with Dry Sponge	100/bx	BX
486-3392	Speci-Sponge® Bags with Dry Sponge and Sterile Gloves	100/bx	BX
486-3423	Pre-Moistened Spec-Sponge® Bags with Sterile Gloves	100/bx	BX
486-3422	Pre-Moistened Spec-Sponge® Bags	100/bx	BX

Whirl-Pak® Hydrated PolySponge™ Bags

Make environmental surface sampling faster and easier with these pre-moistened bags. The durable high-density polyurethane sponge is ready to use and resists tearing and fraying. Each sponge is packed in a sealed 18-oz (532 mL) write-on bag and is hydrated with 16 mL of HiCap™ Neutralizing Broth and terminally gamma processed to guarantee sterility. Box contains five foil pouches with 20 sponges each for a total of 100 sponges. Bags are 9"L x 4"W (11.5 x 23 cm) with a 2.5 mil (.064 mm) thickness. Has a two-year shelf-life with ambient storage at 36° to 86°F (2° to 30°C).

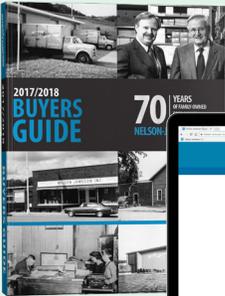

To use the sponge, tear open the top of the Whirl-Pak® bag, squeeze out any excess HiCap Neutralizing Broth, swab the surface, insert the sponge back into the bag, fold the top of the bag over three or more times, and bend in the wire tabs to close, then send to a lab for testing.

3M™ Quick Swabs

Ready to use environmental swab system consists of a 5" rayon-tipped swab which contains letheen neutralizing buffer to facilitate recovery of bacteria. The swabs can be used wet or dry to sample surfaces and quickly deliver 1.0 mL of sample onto a 3M Petrifilm™ Plate. Handy vinyl-covered wire rack which holds up to 50 swabs is sold separately.

Stock #	Description	Packaging	Unit
460-3432	3M™ Quick Swab	50/bx	BX
460-3434	3M™ Quick Swab	250/ca	CA
446-3340	Swab Rack	1/ea	EA

Hygiena™ Q-Swab™

Environmental Swab Collection System

Save time and money by eliminating the need for pipettes and broth preparation. Q-Swab is a ready to use dilution and delivery device used in the food and beverage industry for environmental surface sampling. Using patented Snap Valve™ technology, broth is released down the swab shaft, neutralizing residue sanitizers, and facilitating recovery of bacteria. The sample is then ready to be poured onto media or streaked onto agar plates for culturing. Q-Swabs can be used either wet or dry, and have a 12-month shelf life.

Stock #	Description	Packaging	Unit
332-3999	Swabs with Buffered Peptone Water	250/bx	BX
332-3200	Swabs with Letheen Broth	250/bx	BX
