June 14, 2021

Dear Valued Customer,

In the next couple months, we will be discontinuing the Calibration Control Kit (PCD4000) from our product portfolio. It will be available for sale until inventory runs out.

You can continue to use your Calibration Control Kit to verify calibration of your Hygiena™ Hygiene Monitoring System in accordance with the product instructions. As an improvement to Calibration Control Kit, we now offer CalCheck an advanced LED calibration verification device compatible with EnSURE™ Touch, EnSURE™, and SystemSURE Plus Hygiene Monitoring Systems.

CalCheck is a reusable LED calibration verification device for quick and reliable instrument calibration verification in less than one minute. Containing both positive and negative calibration controls activated by the click of a button, CalCheck allows for on-site instrument calibration checks to prove to auditors that your instrument is working properly.

Benefits of Using The CalCheck LED Calibration Verification Device
• Verify instrument calibration in-house as part of a quality control program
• Demonstrate due diligence to auditors and proves that your system is working properly
• One-time purchase allows for years of calibration verification
• Powered by an easily replaceable coin battery
• Stable LED-based light source
• Compatible with all Hygiena™ luminometers (EnSURE™ Touch, EnSURE™, and SystemSURE Plus)
• When used with EnSURE™ Touch, calibration verification data can be wireless synced to SureTrend Cloud for easy access during an audit.

To learn more about CalCheck visit our website or watch the CalCheck instructional video.

We value your loyalty and strive to provide you with the best quality, products, support and customer service. If you have any questions or concerns, please do not hesitate to contact your sales representative. You can also contact Hygiena™ by phone at 1-888-HYGIENA or by email at customerservice@hygiena.com
