

51" Aluminum Handle

Series 2935

Hanging Hole

Color-coded hanging hole allows for easy storage

Hygiene Sleeve

Long hygienic sleeve increases durability and makes the handle ergonomically friendly and easy-to-use

Hygienic Euro Thread

Hygienically designed Euro thread prevents walk-off and is easy to clean

Durable Handle

Basic aluminum handle is durable and suitable for most applications in the food processing industry

Vikan's standard aluminum handle is an important part of color-coding programs and can be used with all brooms, squeegees, and scrapers. The handle with the attached item should reach to the chin of the user to prevent occupational back injuries.

51" Aluminum Handle

2935

Vikan's long handle features a hygienic sleeve that makes it more durable and promotes color-coding programs. The handle is long enough to be comfortable to use for most employees, and light enough to be ergonomically friendly.

Unit Weight: 1.08 lbs.

Colors

When ordering, add the color digit to the base part number to denote color.

Fully updated product specifications are available at Vikan.com.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.

Please see the full-line catalog for a complete list of Remco™ and Vikan® products.
