

Glo Germ™ Company
PO Box 537
Moab, Utah 84532

Safety Data Sheet (SDS)

Section 1: Identification

GLO GERM™

UV LED Hand held flashlights (This SDS covers all sizes and led orientations)

Emergency & Information Telephone Numbers
1-800-842-6622 Glo Germ™ M-F 9 am -5 pm MST
1101 South Murphy Lane, Moab UT 84532

1-800-424-9300 ChemTrec®

PLEASE NOTE: The Safety Data Sheet (SDS) requirements of the Occupational Safety and Health Administration (OSHA) for chemicals are not applicable to manufactured articles such as lamps. No material contained in a lamp is released during normal use and operation. The following information is provided as a service to our customers.

Recommended use: Training aid used to illuminate the Fluorescent Glo Germ™ particles as used in hand washing, cross-contamination avoidance and surface cleaning effectiveness specifically to avoid transmission/spread of microbes. For external use only. Do not shine into eyes. Always avoid contact with eyes.

Section 2: Hazard(s) Identification

No hazardous ingredients present in intact product. Do not look directly into the lit end of the flashlight or shine into the eyes of others. Use under competent adult supervision.

Health Rating: 0

Flammability Rating: 0

Reactivity Rating: 0

HMIS Rating Scale: 0 = Minimal; 1 = Slight; 2 = Moderate; 3 = Serious; 4 = Severe;

N = No information provided by manufacturer; * = Chronic Health Hazard

Section 3: Composition/Information on Ingredients

No material contained in a lamp is released during normal use and operation. The following information is provided as a service to our customers.

Section 4: First-Aid Measures

First aid measures are not applicable for normal use.

Eye contact: Most UV light sources have the potential of causing photokeratitis (eye injury) with only short exposure periods and should, therefore, be used in a manner which limits exposure time. Do not look directly into the lit end of the flashlight or shine into the eyes of others. Use under competent adult supervision.

The symptoms of overexposure to the eyes are not widely known. They are:

- a burning and painful sensation in the eye
- a sensitivity to light
- the sensation of a foreign object in the eye, sometimes described as sand in the eye

These symptoms usually develop several hours after the overexposure occurred. If an eye injury is suspected, the individual should be examined by a physician.

Skin contact: The symptoms of UV overexposure to the skin are well known and characteristically called sunburn. If a skin injury is suspected, the individual should be examined by a physician.

Inhalation: Not applicable.

Medical Conditions: Not applicable.

Section 5: Fire-Fighting Measures

Flammability Class NA

Flash Point: None

Explosive Range: None

Flammable Limits: Unknown

LEL: Unknown **UEL:** Unknown

Extinguishing Media: Use dry chemical, alcohol foam, carbon dioxide or water spray when fighting fires involving this product.

Fire Fighting Instructions: Keep unnecessary people away. Isolate area. Stay upwind. Wear self-contained breathing apparatus.

Special Fire Fighting Procedures: No special firefighting procedures are indicated.

Unusual Fire and Explosion Hazards: None

Section 6: Accidental Release Measures

This product is not defined as a hazardous waste under EPA 40 CFR 261.

Section 7: Handling and Storage

Handling: Use care when handling to avoid breaking the flashlight.

Storage: Take steps to safeguard the flashlight from accidental damage.

Section 8: Exposure Controls/Personal Protection

Eye protection: Not required for normal use. Do not look directly into the lit end of the flashlight or shine into the eyes of others. Use under competent adult supervision. Most UV light sources have the potential of causing photokeratitis (eye injury) with only short exposure periods and should, therefore, be used in a manner which limits exposure time.

Please Note: Individuals sensitive to UV light, taking photosensitizing medications, or those who lack optic lenses or who may have other abnormal eye conditions may not be adequately protected against exposure to artificial UV light and should avoid it altogether.

Long-wave, **UV-A**, ultraviolet light, with wavelengths ranging from **400 – 315 nm**, is harmless to skin and eyes. It causes no changes in the body and requires no protective precautions in normal use as recommended by the Glo Germ™ Company.

UV-A long-wave light within the range outlined above is relatively safe. However, prolonged exposure of the black light to the eyes may cause eye irritation. Symptoms, which can include tearing of the eyes, a burning or painful sensation in the eyes, sensitivity to light, or a sensation like that experienced when a foreign object is lodged in the eye, may not be present until several hours after exposure. To reduce likelihood of experiencing adverse symptoms, individuals should properly shield themselves and use the black lights only as directed. The above assumes a healthy eye and no corrective lenses. Therefore, the Glo Germ™ Company recommends that the lamp never be held within 6 inches of the eyes and do not look into the light at close range. This lamp should be used under adult supervision.

Exposure to UV lights should be limited. Black lights should not be tampered with, nor should their shields or lenses be removed. The Glo Germ™ Company uses black lights to detect “simulated” germs on hands and surfaces. Therefore, hands and surfaces only should be exposed to the light. Individuals should not look directly at the UV light.

Short-wave, **UV-B**, ultraviolet light, with wavelengths ranging from **315 – 280 nm**, does cause chemical changes in the body, such as the formation of vitamin D. With prolonged exposure, reddening of the skin and inflammation of the eyes may occur. While these are uncomfortable effects, they are temporary and no permanent damage will result. Ordinary glass or plastic will completely filter out short-wave ultraviolet light. The Glo Germ™ Company does **not** offer UV-B lights, only safe UV-A.

Ultra Shortwave, **UV-C** radiation has been known to cause blindness, ‘blind spots’ in the eyes, sun-burning of the skin, and skin cancer. For these reasons, the Glo Germ™ Company does **not** sell or offer short-wave, UV-C, lights. These lamps are used to disinfect objects, to sterilize water or other liquids, in special laboratory applications, and is the main ultraviolet wave length from the Sun and welder torches. The wavelength ranges from **280 – 100 nm**. The Glo Germ™ Company offers only safe UV-A.

Skin protection: Not required for normal use. **Please Note:** Individuals sensitive to UV light, taking photosensitizing medications, or those who lack optic lenses or who may have other abnormal eye conditions may not be adequately protected against exposure to artificial UV light and should avoid it altogether.

Respiratory protection: Not applicable

Ventilation: Not applicable

Section 9: Physical and Chemical Properties

Not applicable to product as material is stable, non-reactive and not a fire hazard the following have not been evaluated further: Auto-ignition temperature, Flammability (solid, gas), Upper/lower flammability or explosive limits, Decomposition temperature, and Viscosity, Upper/lower flammability or explosive limits, Vapor pressure.

Section 10: Stability and Reactivity

Stable or Unstable: Stable

Conditions to avoid: Heat, sparks, and open flame

Incompatibility (materials to avoid): Strong Oxidizers

Hazardous Polymerization: Will Not Occur

Section 11: Toxicological Information

No material contained in our UV flashlight is released during normal use and operation. We have not carried out any animal testing, therefore we have no Toxicological Data specifically for this product.

Section 12: Ecological Information* (non-mandatory)

Ecotoxicity: Not regarded as dangerous for the environment when disposed of properly.

Section 13: Disposal Considerations* (non-mandatory)

Dispose of in accordance with local, state, and federal regulations. To check state regulations or to locate a recycler, go to www.lamprecycle.org.

Section 14: Transport Information* (non-mandatory)

Not regulated.

Section 15: Regulatory Information* (non-mandatory)

Not applicable.

Section 16: Other Information

Most Recent Revision 4/8/2015

Disclaimer: The information contained herein is accurate to the best of our knowledge. Glo Germ™ Company makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or in combination with other substances.

*Note: Since other Agencies regulate this information, OSHA will not be enforcing Sections 12 through 15(29 CFR 1910.1200(g)(2)).
