

2400 East Fifth Street- P.O. Box 647
Marshfield, WI 54449-0647

To collect spilled mercury quickly, just unscrew the lid with the foam pad, and press pad firmly onto the spill. This pressure forces the mercury into the pad. When the lid is screwed back onto the jar, the pad is compressed against the jar's freestanding perforated plate, releasing the mercury into the jar bottom.

Container holds 125 mL of mercury.

SDS is not required for the Mercury Collector as there are no chemicals included.
