

# Fingertip Mat - EPDM

#MR-ER42BK

SPECIALITY | PREMIUM

Fingertip Mat - EPDM is a technical product made from Ethylene Propylene Diene Monomer, commonly known as "EPDM". It can withstand high temperature and has chemical resistance to acids and alkalis. The mat is UV-stable makes it highly resistant to ozone effects, extreme weather conditions, and is ideal for long term outdoor applications.

#### APPLICATION ENVIRONMENT:

Any entrance, industrial sites, sensitive production sites, and outdoor applications.

#### FEATURES

- Fingertips wipe off dirt and mud from footwear.
- Traps dirt below the walking surface.
- Corrugated pattern on the bottom helps prevent mat movement.
- All four sides have beveled edging to improve safety at the facility entrance.
- Shake, vacuum or hose to clean.
- Made of top-quality rubber.

#### MATERIAL

Rubber

#### TENSILE STRENGTH

4+/-1

#### ELONGATION

450+/-50

#### HARDNESS

50+/-5

#### SPECIFIC GRAVITY

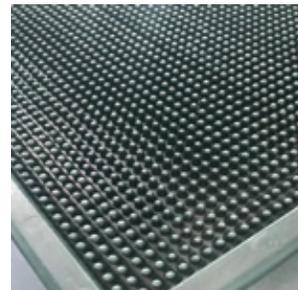

1.4+/-0.05

#### TEAR STRENGTH

30+/-5

#### HEAT RESISTANT

No visual damage
