

TECHNICAL DATA SHEET

BACTI-KIT

2017

Product Description: The **BACTI-KIT** is a product of Dairy Technology for use by the Dairy Industry. The **BACTI-KIT** is a self contained sterilized sampling kit for use in the field or laboratory setting. The sampling kit is made from a paper core tube wrapped in a special sealed Kraft paper. Inside the sealed tube are 25 poly sampling straws. The sampler is capped on one end with a sealed plastic cap. The other end contains a special opener allowing one sampler to be removed at a time without contamination.

Componets: The components come in three sizes for differing applications as needed. All three sizes are identical in their makeup and contain the same number of sampling straws. The sizes are as follows:

-24 " sampler length, -18" sampler length, -12" sampler length

Kraft paper sealed paper core

Polystyrene end caps and dispenser end

Extruded Poly straw samplers

Sterilizing gas (residual amounts may linger after evacuation inside tube)

BACTI-KITS are produced when ordered to insure freshness. All components are made in the USA and assembled, packaged and shipped from the USA.
