

Product Data Sheet
Nasco Sludge Judge® (15' Long)
C09247WA

- **Material** – Clear plastic (Butyrate) tubing
- **Inner/Outer Dimensions** – .885 inches (+/- .005), 1.045 inches (+/- .005)
- **Construction** –
 - **Top Section** (C09252WA) – Five-foot length, threaded nylon connector on one end, three-foot nylon rope on the top end, one-foot markings on the tube.
 - **Middle/Extension Section** (C09251WA) – Five-foot length, threaded nylon connector on each end, one-foot markings on the tube.
 - Additional extension sections can be added to make the unit longer.
 - **Bottom Section** (C095250WA) – Five-foot length, nylon float valve on one end, threaded nylon connector on the other, one-foot markings on the tube.
- **Capacity** – Holds approximately three ounces (89 ml) per foot.
- **Application** – As unit is lowered into the liquid, the float valve opens allowing material to enter; when bottom of tank is reached, unit is raised up with a slight tug to set the valve holding the material inside. Sludge level can be seen using the one-foot markers on the tube. Touch the tip of the float valve against a hard surface and the liquid will empty out through the bottom section.
- **Accessories** – A six-foot cleaning brush made of galvanized steel wire and polyester bristles is available.
