June 25, 2013,

Per your request, this is to certify that, to the best of our knowledge, the materials used in the composition of items 41082xx and 41083xx have been formulated using components that comply with the United States Food and Drug Administration (FDA) requirements for resins used in food contact applications, as listed in the Code of Federal Regulations Title 21 (CFR 21).

While items 41082xx and 41083xx may be used in an environment where food contact takes place, the items themselves are not intended for food contact as they are floor cleaning tools. As such, we make no claims as to their suitability for use in food contact applications.

Please feel free to contact us with any questions.

Best Regards,

Erik T. Backhaus
