

Plant Starch Spoon

Disposable

FEATURES:

- Utilizes significantly less plastic than traditional disposable cutlery
- Made of plant starch (PSM) and constructed from 70% renewable resources
- Sturdy, reinforced form resists bending and snapping for quality, single-service use
- Deep bowl allows guests to easily scoop up and enjoy your offerings
- Withstands heat up to 200 degrees Fahrenheit for use with both hot and cold foods
- Can simply be thrown out for quick clean up

Spoons are made of plant starch material, a renewable resource, and offer strength and heat tolerance. They are ideal for hot foods and liquids. Reinforced handles of these 7" long spoons provide extra strength. Cutlery is not recommended for microwaves and is not compostable.
