SENSAFE.COM

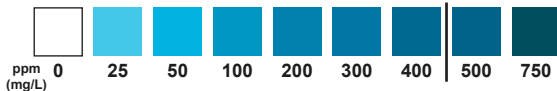

IMPORTANT: Store in cool, dry place (below 90°F/32°C) and away from direct sunlight.

TEST PROCEDURE:

1. Dip one test strip into a water sample for **1 second**.
2. Remove the strip and shake once*, briskly, to remove excess water.
3. **Wait 30 seconds** (for values above 400ppm, wait 90 seconds for full color development), then match to the color chart. Complete color matching **within 30 seconds**.

*Shake strip towards ground and away from possible eye contact.
