Sponges and swabs designed specifically for microbial surface sampling.

## 3M™ Sponge-Sticks\*

- Allows sampling without the need to directly handle the sponge, increasing operator efficiency with less risk of contamination
- Easier to reach ceilings, into drains and pipes, and around equipment
- Sturdy sponge snaps free from plastic handle after sampling
- Biocide-free cellulose sponge maintains *Listeria* organism viability within 72 hours of refrigeration\*\*
- Available in dry or pre-hydrated formats, with or without irradiated gloves

## 3M™ Hydrated Sponges

- Ready-to-use, pre-hydrated sponges for easy and convenient sample collection
- Available in a variety of pre-hydrated dilutions
- Biocide-free cellulose sponge maintains *Listeria* organism viability within 72 hours of refrigeration\*\*
- Durable sponge withstands scrubbing
- Sponge bag with write-on label
- Available with or without irradiated gloves

## 3M™ Dry-Sponges

- Dry sponge in a sample bag
- Ideal for those who prefer to use their own sampling broths or a broth not available with the 3M™ Hydrated Sponges
- Durable sponge made from biocide-free cellulose to help maintain organism viability

## 3M™ Extendable Poles

- Designed for use with the 3M™ Sponge Stick for easier sampling of remote and hard-to-reach areas
- Lightweight, sturdy aluminum construction
- Minimizes bending and stretching of plant personnel
- Safely sample ceilings and tanks
