- **Red**
- **Black**

Bulk Package:

- **100 pair per case**

Superior Contamination Protection in Wet or Dry Application

ISA Corporation's FLATFOOT® shoe covers are designed specifically for use in clean-ups, general industrial and maintenance applications, food processing plant operations, and agricultural applications.

ISA's shoe covers provide a superior barrier to protect both workers and environment.

Made from 100% natural rubber, these shoe covers surpass the physical requirements for industrial use.

As a result of their superior resistance to abrasion, chemical attack, cuts, punctures and snags, ISA shoe covers protect better and last longer.

ISA's shoe covers have an acid embossed tread which offers excellent slip resistance for both wet and dry applications.

FLATFOOT® shoe covers offer a high end solution for contamination protection, safety and reliability at a low cost.
