

Proudly Manufactured in the USA.  
Available in market globally.  
**Ezi-action®**  
DRUM PUMP & ACCESSORIES

## TUBING/ HOSE

DO YOU WANT US TO SUPPLY HOSE OR TUBING WITH YOUR EZI-ACTION® DRUMPUMPS?

Tubing or hose with an ID of 19mm 3/4" ID will fit onto the spout of the Ezi-action® Drumpump.

This permits:

- More accurate dispensing into receptacles with a small opening.
- Allows for direct dispensing into engines and AdBlue tanks on vehicles.

WE SUPPLY PVC CLEAR HOSE FITTED WITH THE EZI-ACTION® NON-SIPHON CHECK VALVE TO PREVENT ACCIDENTAL SIPHONING.

Installation of the Ezi-action® Non-siphon Check Valve and Tubing is easy.

## EZI-ACTION® NON-SIPHON CHECK VALVE

DO YOU WANT TO PREVENT ACCIDENTAL SIPHONING OF YOUR DRUM OR IBC WHEN A LONG TUBE IS FITTED?

**The Ezi-action® Drumpump will siphon liquid from a full drum or IBC when a long hose is fitted and the source of the fluid is higher in elevation than the receptacle.**

Unintentional siphoning can be controlled with an Ezi-action® Non-Siphon Check Valve inserted into your hose.

THE EZI-ACTION® NON-SIPHON CHECK VALVE:

- Permits air to enter the hose and effectively breaks the siphon.
- Is constructed from polypropylene with a viton seal.
- Is provided with diagrammatic instructions for easy installation into your hose.

Installation is easy.
