

Disposable Plastic Serological Pipettes

Designed for accurate and rapid fluid dispensing; these polystyrene pipettes are sterile, pyrogen free and utilize a unique filter plug to prevent overfilling. The filter plug eliminates lint fibers and ensures plug stays in place. The sharp, black, highly legible permanent graduations prevent ambiguity and guarantees precise reading and accurate dispensing to +1 - 2%. Reverse graduations show volume removed or remaining on all pipettes larger than 1mL. Generous negative pipetting provide additional pipetting volume.

Argos pipettes are made from transparent medical grade* polystyrene sterilized by gamma irradiation. Each lot is tested for endotoxins (C.5 Eu/mL) (ISO T0993-11), cytotoxicity (ISO10993-5) and are guaranteed non-hemolytic (ISO10993-4). Ideal for tissue culture applications.

Pipettes are supplied individually wrapped in a fiber-free paper & plastic combination that is easy to open or available in bulk. The uniform mouth piece fits all major pipettors and have color coded TD rings for ease of identification. 1.1 & 2.2 bacteriological pipettes meet the A.P.H.A. standards for the examination of dairy products. Calibrated TD with blow out. Meets AST< E934.

Dispenser box allows user to remove pipettes without opening top. Universal stacking design requires less laboratory space and each box is color coded for easy recognition.

Color coded rings for easy identification

Fiber free paper wrap ensures quick peel apart opening

Cat. No.	Capacity mL	Graduation mL	Negative Grad. mL	Color Code	Qty
Bulk Pipettes
