

Lot Number & Traceability Label Description

Each purchase order is assigned a job/lot number. The lot number is located at the bottom left hand corner of each product label for tracking and traceability purposes. The lot number will show on all shipping documents and will show as the job # on the invoice.

Each unit of product will have a label affixed to inside of each core as well as the outer wrapping of each roll, or if it is an individually cut bag it will be on the case that it is packaged in.

Each pallet will have a larger label affixed to 2 sides of each pallet. The label will show the same product information as well as the shipping location and a breakdown of what rolls are contained on that pallet, and the lot number will be located on the bottom left hand corner.
