

New from Honeywell Safety Products

Uvex HydroShield[™] Anti-Fog Coating

CLEARER. LONGER. SAFER.

HydroShield is a groundbreaking anti-fog lens coating. Test results have shown that it provides up to **60X longer-lasting* fog free vision** than competitive products.

HydroShield is permanently bonded to the lens, and requires no application and no maintenance. Its dual-action properties work together by first absorbing and then repelling moisture away from the lens once a saturation point has been reached.

Superior Anti-Fog Performance

*HydroShield was tested under the most stringent anti-fog standard in the world, the **European EN 166/168 standard**. Under this time-lapsed test, a lens is soaked in water for two hours to simulate the cumulative moisture lenses are subjected to over time from sweat, washing and work environments. After drying, steam is projected onto the lens and the time-to-fog is measured. During this test, HydroShield lenses remained fog-free 60X longer than competitive products (for over 2 minutes), while competitive products fogged in a median time of less than two seconds.

Ordering Information & Support

HydroShield is available only from Honeywell on these top selling Uvex eye protection products: Genesis[®], Genesis XC[®] and Protégé[®] safety eyewear and Uvex Stealth[®] goggles. Additional Uvex products will be released with HydroShield throughout 2015. Please see reverse for ordering information and pricing.

If you have any questions or would like additional information about HydroShield, please contact your Honeywell Safety Products sales representative or our Customer Care team at 800-430-5490 (US) or 888-212-7233 (CANADA).
