MORE ABOUT THIS ITEM

Use these sterile, disposable lab scoops to help reduce cross contamination. Manufactured from sturdy, one-piece, FDA-grade polystyrene, they can be used to hold a variety of media and have an ergonomic, comfortably curved handle to make sample retrieval easy. A flat bottom allows them to be placed on a surface without spillage and to be used as a weighing dish.

These individually bagged laboratory scoops are gamma irradiation sterilized SAL 10⁻⁶; free of BSE/TSE, heavy metals, BPA, and phthalates; and lot traced. A Certificate of Irradiation is available upon request. Specified volumes are approximate and not intended for measuring specific volumes.
