

#4100 Specifications:

11" Post Rack 6 Hooks – White PVC coated, for HACCP compliance and “best practices” sanitation.

10.25" L x 3.5" W x 4" H with 6 – 2.5" long hooks.

Hooks are 1" off wall to allow cleaning behind rack & keeps most brushes from contacting the wall.

Hooks are bent upwards (75 to 80 degrees) from the wall to insure brushes and utensils do not vibrate off the hooks.

Two 2-hook sets are spaced 1.5" apart to hold utensils, scrapers, scoops & shovels upwards, or for utensils that do not have holes in the handles.

The far left hook is 3.5" lower than the far right hook, so wide squeegees, push brooms, etc., do not hit each other.

Hooks alternate horizontally high & low by 3.5", to allow similar brushes & utensils to hang side by side, close together without hitting each other.

White PVC coated wire rack, is made to withstand daily cleaning with bleaches, common acids, bases and solvents used for sanitizing food plants.
