## Multi-Purpose EPA ACCEPTED Disinfectant

- *Disinfects in five minutes and protects against odor*
- *Effective against Pseudomonas aeruginosa, Staphylococcus aureus and Salmonella enterica*

# Confidence, Convenience, and Control!

EfferSan is a highly effective multi-purpose disinfecting and sanitizing tablet. When dissolved in water, it creates a mild, non-irritating solution.

Unique to this technology is kill-power performance that is twice as effective compared to bleach with one major difference. We have eliminated the “bleaching” effect of traditional chlorines so EfferSan remains skin and fabric friendly. Freedom to use one sanitizing product on a variety of surfaces can also provide a real labor savings. Effective disinfecting and sanitizing has never been so simple!

- EfferSan’s tablet formulation makes it easy to measure accurately
- Safe, non-irritating to skin
- Does not bleach fabrics/carpets
- Eliminates odors by eliminating bacteria – does not mask with scents

EfferSan is a no-rinse sanitizer and since it doesn’t contain a masking fragrance it won’t leave any unpleasant and enduring residues. EfferSan’s ability to remove odors stems from its ability to eliminate germs, not cover them up. EfferSan contains a subtle chlorine scent, signaling effectiveness without being overwhelming. EfferSan is very versatile and can be mixed in pre-labeled reusable large containers and/or 32 ounce pre-labeled spray bottles. EfferSan can be applied directly on hard surfaces without fading or whitening effects.

## For Use In...

- Food processing
- Milk handling and processing
- Breweries
- Bottling plants
