# DEPTIL CIP SAN™

*Low-Foam Acid Sanitizer - EPA #4959-41-3276*

**DEPTIL CIP SAN™** is a patented low-foaming ACID SANITIZER for C.I.P. and C.O.P systems. **DEPTIL CIP SAN™** is efficacious and fast acting. It is based on the combination of Decanoic, Nonanoic, Propionic and Phosphoric Acid. **DEPTIL CIP SAN** is effective against a wide range of micro-organisms.

---

## BENEFITS & FEATURES:

Exceptional hard water tolerance.  
Proven efficacy.  
Low Foaming.  
Rinses easily, leaving film-free and shiny equipment.  
Patented

---

## PROPERTIES:

Appearance: Clear, colorless liquid  
Density: 9.5 lbs/gallon  
pH: 2.8 (1% in water)  
Odor: Pungent

---

## USAGE GUIDELINES:

### FOOD PROCESSING AND DAIRY EQUIPMENT:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Remove gross food particles and soil by a pre-flush or pre-scrape and when necessary, pre-soak treatment. Clean all surfaces with a chlorinated alkaline cleaner, followed by a potable water rinse prior to the application of the sanitizing solution.

Sanitize equipment prior to use with a solution of 1 ounce per 6 gallons of water, to provide 90 ppm of decanoic and nonanoic acid. Circulate sanitizing solution through CIP or COP systems for a minimum of 2 minutes. Sanitizing solution should have a pH of 4 or below. Completely drain solution and allow to air dry. For mechanical operations, the prepared use solution may not be re-used for sanitizing, but may be re-used for other purposes such as cleaning. For manual operations, fresh sanitizing solution should be prepared daily or more often if the solution becomes dirty or soiled.

Follow state and local Health Department regulations for cleaning and sanitizing food processing and dairy equipment.

U.S. Patent No. 5,330,769
