SAN-I-KING NO. 451

PRODUCT DESCRIPTION

San-I-King, No. 451 is a concentrated liquid chlorine sanitizer.

EPA Reg. No. 2686-20001

FEATURES & BENEFITS

- Contains 12.5% sodium hypochlorite by weight
- EPA registered sanitizer
- No rinse sanitizer when used according to label directions
- Excellent sanitizer and deodorizer for spray, circulation, or immersion
- Effective as a chlorine CIP additive to remove protein soils
- Non-phosphated to reduce effluent phosphorous levels

USES AND APPLICATIONS

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- For sanitizing, pre-clean all surfaces and rinse. Use one ounce of San-I-King, No. 451 to 5 gallons of water (200 ppm). Immerse all utensils for at least two minutes.
- For sanitizing food contact surfaces, available chlorine must be maintained between 100 ppm to 200 ppm.
- Do not rinse equipment with water after treatment and do not soak equipment over night. If the solution exceeds 200 ppm available chlorine, rinse equipment with potable water and re-sanitize according to label prior to use.
- San-I-King, No. 451 is approved by the EPA for multiple applications such as water treatment, egg sanitizing, fruit and vegetable washing. Ask your representative for the Product Information Bulletin.
- For special package sizes of San-I-King, No. 451 certified to NSF Standard 60, reference AWWA B300-Hypochlorites for recommended handling and storage practices for sodium hypochlorite.
- Consult your Hydrite representative for specific recommendations.
