## FDA Certification

Based upon our knowledge and the assurances received from our supplier, the BG-T4 film used in the manufacture of Whirl-Pak® sampling bags is produced from a blend of polyethylene resins that have been certified to meet the requirements of FDA regulations 21 CFR 177.1520 and 21 CFR 178.2010, 3297. This means that these materials are acceptable for use in food packaging applications at temperatures below cooking temperatures.

Nasco does not have information as to the specific end use and specific conditions pouches will be exposed to.

If you have any questions or require additional information, please feel free to contact me.

A handwritten signature in blue ink, appearing to read "J. P. R.", is positioned above the contact information.
