Subject: RE: Best Sanitizers

Dear Jody,

Thank you for your question. NOP does not regulate hand sanitizers. Your clients' organic status will not be compromised by using personal sanitation products that are covered under an approved HACCP plan.

I hope this information helps.

Sincerely,
Mark A. Bradley
Associate Deputy Administrator
USDA, AMS, TM, National Organic Program

Subject: Best Sanitizers

Dear Mr. Bradley:

Our company manufactures 71% ethanol based hand sanitizers, the other ingredients being purified water and coconut based glycerin emollients. Some of our customers are inquiring as to our organic status. We are Kosher, Pareve, NSF certified, GRAS and meet current FDA Regulatory Standards and HACCP guidelines as a no-rinse hand sanitizer for the food processing industry. My questions is: Will our customers' organic status be compromised by using our hand sanitizers, or is this something beyond the scope of the National Organic Program?

Best regards,
Jody Jones
