

January 2, 2018

To Whom It May Concern,

Best Sanitizers Dry Wipes are manufactured from spunlaced nonwoven fabric composed of polyethylene terephthalate, cellulose, polypropylene, polyethylene, polyethylene terephthalate copolymer and titanium dioxide. These materials are listed within the direct and indirect food additives section of FDA 21 CFR 172, 173, 175 or 177.

The same wipe is used in our ALPET D2 Surface Sanitizing Wipes which are a EPA registered Food Contact Surface Sanitizer.

The wipes do not contain any silicone, binders, fillers or other chemical additives.

Sincerely,

A handwritten signature in blue ink, appearing to read 'C. Linville', is positioned above the printed name.
