Re: Memorandum regarding revisions to the Alpet D2 Surface Sanitizer, 5 gallon pail with insert for the HACCP Defender and SmartStep (Part # SS10002-BSS)

Dear Dakonya,

We have made a slight change in appearance to the *Alpet D2 Surface Sanitizer, 5 gallon pail with insert for the HACCP Defender and SmartStep (Part # SS10002-BSS)*. There are no functionality changes.

The pail now has a DOT approved shipper cap over the bung. The red bung that was on it previously has been replaced with a natural plastic color. The end of the suction line for the SmartStep or Defender will still have the red cap which quick connects to the pail.

When a customer receives the pail they need to remove the shipper cap, punch the induction seal on the back of the pail, slightly open the vent, and then screw on the red cap from the footwear sanitizing unit.

Please let us know if you have any questions.

Thank you,

April Zeman
National Account Manager
