KIMTECH* Pure* (W4 Dry, W4 PreSat) Wipers

KIMTECH* WETTASK* Wipers

Dear Valued Customer:

Thank you for your enquiry regarding the use of Wypall and Kimtech wipers in your facility. In food processing facilities, the wipers are acceptable for use in and around food processing areas. These products are intended for the cleaning of surfaces such as those where food may have come into contact (countertops, tables, equipment etc.). Incidental food contact should not be an issue, however Kimberly-Clark has not developed any data to support the use of our towels and wipers for direct food contact. These instructions are based on our knowledge of our own manufacturing practices and a careful review of the information provided to us by our raw material suppliers as part of our internal review system. The representations above are accurate as of the date of this letter.

Thank you for your interest in Kimberly-Clark* products. Please feel free to contact me if you need additional information.

Kind Regards,

Shashi Donthamsetty, Ph.D.
