

## m-Endo Broth, Plastic Ampules, pk/50

Product #:	2373550
USD Price:	\$86.45
Available	

m-Endo Broth, pk/50 2-mL ampules (plastic). Selectivity: Total Coliform Bacteria and *Escherichia coli*.

m-Endo broth detects total coliform bacteria (colonies with a greenish-gold sheen). For potable water samples, confirm with Lauryl Tryptose and Brilliant Green Bile Broth tubes. Samples that test positive for total coliform bacteria should be further analyzed for the presence of fecal coliform or *E. coli* using EC Medium or EC Medium with MUG respectively.

**Save valuable time and money using Hach prepared media for membrane filtration methods.**

**Cold shipment of product is available to US customers. See similar product 2373550CP**

Cold shipment is likely to ensure the full shelf life of this product, whereas long, unrefrigerated transit in warm weather may decrease shelf life. Damage due to excessive heat in transit is not covered Hach's standard warranty.
