**Primary Applications:**

The Porta-Washer® P is perfect for small facilities or local cleaning applications that require high-pressure to remove soils. Can dispense most liquids; however, the ideal product is a mild, general purpose cleaner that is high in wetting agents. Perfect for heavy soils, environmental cleaning applications like floors, walls and racks - typically non-food processing areas.

Acid products are beneficial in certain applications such as lime scale removal and these acids used as an occasional alternative will help keep the aspirator clean. Highly alkaline products can be used but high-pressure cleaning neither requires nor makes the best use of such products. Mist from these alkalines can damage skin, eyes and the respiratory system.

Features:

- Can vary chemical concentrations through the use of metering tips
- 600 PSI output
- Comes with a 6' Power Cord
- Portable Cart

Utilities Required:

- 120VAC/15AMP
- Water: 20-40 PSI @ 3 GPM at 160° F max temp

Dimensions/Weight:

24" L x 24" W x 40" H; 150 lbs empty

Comes With:

- Four different metering tips
- 40' High pressure hose
- High pressure foam gun

I/O Manual:

Shipped with unit or available on Ecolab On-Demand.
