Reliable results in 60 seconds or less.

## Hach Water Quality Test Strips: Convenient water testing solutions.

Whether you're monitoring water in a wastewater treatment facility or checking the backyard pool, you need a test that's easy, fast and reliable. Now, Hach provides the easiest testing method ever, for the tests you run most often. Our test strips perform a variety of water quality monitoring functions, while they make your job easier. Get the test results you need in less than a minute!

## Fast, reliable and safe: On-site or in the lab.

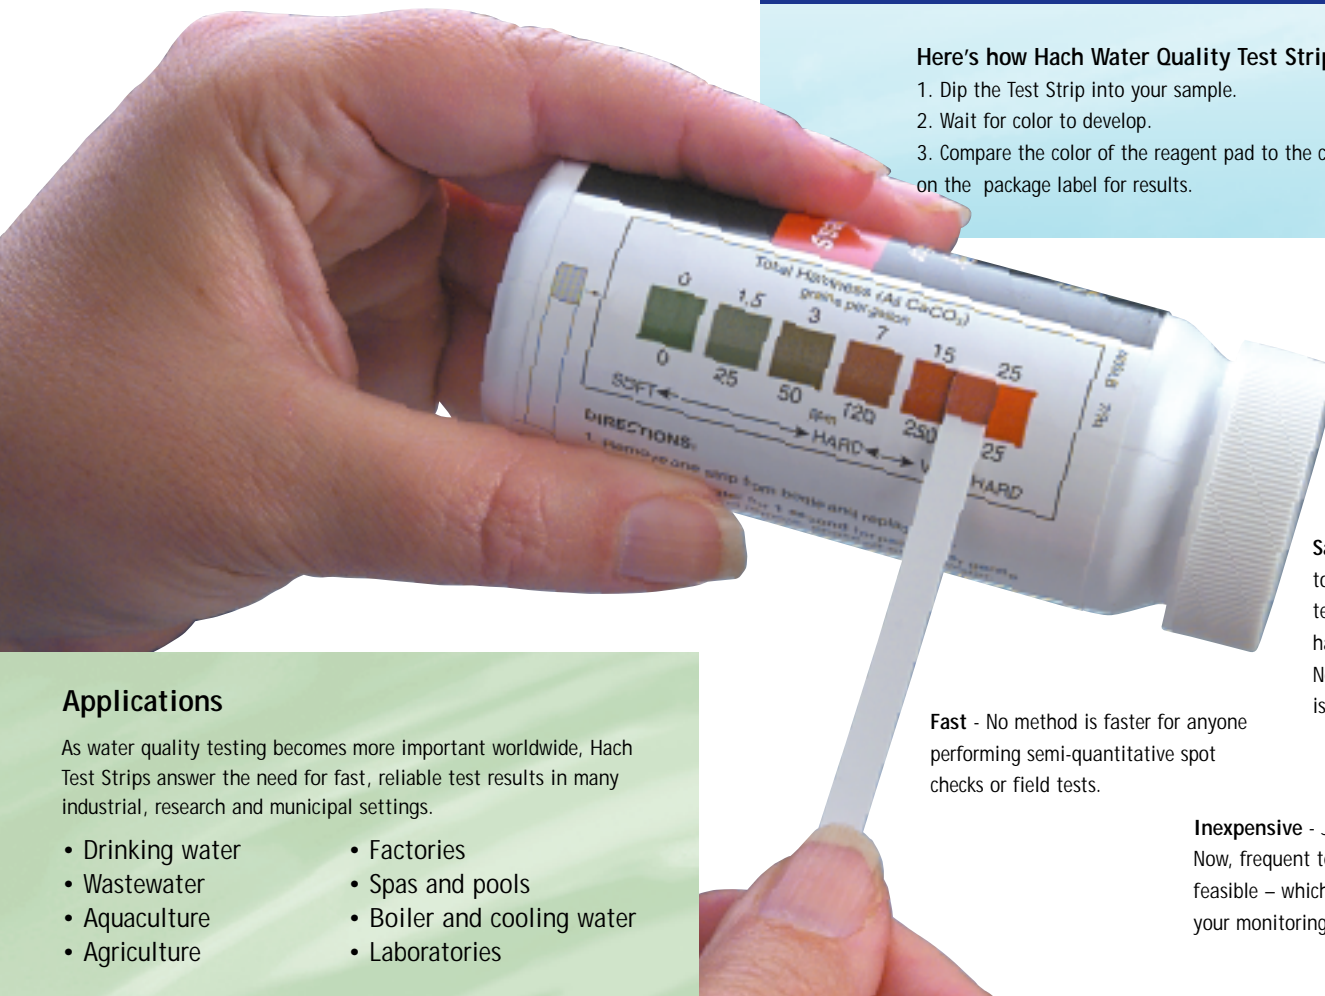

Hach Test Strips are easy to use and easy to read. In the field, technicians can test many samples in only a few minutes, and make immediate evaluations on-site. No measuring, set-up, clean-up or chemical handling are necessary. Hach Water Quality Test Strips are also used in laboratories all over world. Lab technicians use them for pre-test screening – to detect the presence of materials that might interfere with lab testing.

# Just Dip the Strip

## Here's how Hach Water Quality Test Strips work:

1. Dip the Test Strip into your sample.
2. Wait for color to develop.
3. Compare the color of the reagent pad to the color component chart on the package label for results.

**Reliable** - Our Test Strips use proven chemistries based on standard reference methods used all over the world.

**Safe** - Technicians do not need to touch the water they're testing, mix any reagents or handle any other chemicals. No clean-up or special disposal is necessary.

**Fast** - No method is faster for anyone performing semi-quantitative spot checks or field tests.

**Inexpensive** - Just pennies per test! Now, frequent testing is economically feasible - which allows you to improve your monitoring and process control.
