## Materials and Safety

- All lugs are certified NSF for Food Zone (1)
- Certified virgin resin and color
- Conforms with FDA Title 21CFR Sec. 177.1640
- Material: High Density Polyethylene (HDPE)

## Dimensions and Capacity

- Outer Dimensions: 25.5" x 16" x 9"
- Weight:
  - lug - 4 lbs.
  - lid - 2 lbs.
- Calculated Capacity: 13 gallons
- Load: 100 lbs. \*

Practical dimensions and capacity will vary depending on the application.

## Recommended Use

\* Recommended temp range: 28-120 F to hold up to 100 lbs. Will support at least 60 lbs down to 20 F or up to 140 F outside recommended range.

Depending on load and conditions, extreme use range is less than 0 F or greater than 160 F. The lug can become brittle at low temperatures and could deflect or warp at high temperatures.

Care must be taken in these cases to support the handle until tote returns to a normal room temperature.
