

PGL declares that all the nitrile compound Aprons produced meet the requirements according to:

TITLE 21

PART 177 -- INDIRECT FOOD ADDITIVES: POLYMERS

Subpart C--Substances for Use Only as Components of Articles Intended for Repeated Use

Sec. 177.2600 Rubber articles intended for repeated use.

Rubber articles intended for repeated use may be safely used in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food, subject to the provisions of this section.

The substances used in the manufacturing of the Nitrile aprons are included in the list of approved substances within the specification of the regulation or are included as generally recognized as safe for food packaging (GRAS)

A list of the used substances used in the Nitrile compound is:

Elastomers:

Acrylonitrile-Butadiene copolymer.

Vulcanization materials:

- *Sulfur, ground*

Accelerators (total not to exceed 1.5 percent by weight of rubber product):

- *Tetramethylthiuram monosulfide.*
- *Thiram (tetramethylthiuram disulfide)*
- *2-Mercaptobenzothiazole*
- *2,2'-Dithiobis[benzothiazole]*

Fillers

- **CLAY** **GRAS**
- *Silica.*
- *Calcium Carbonate*
- *Titanium dioxide*

Activators

- Zinc Oxide GRAS

Plasticizers

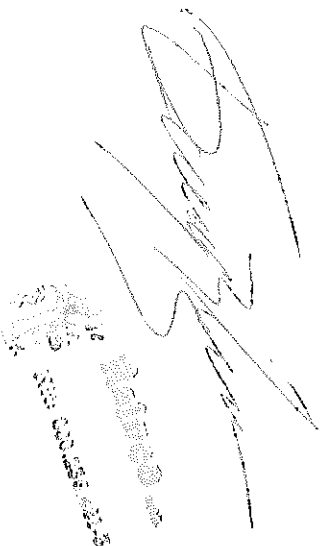

- Di-2-ethylhexyl terephthalate

Antioxidants and antiozonants (total not to exceed 5 percent by weight of rubber product).

- Styrenated phenol

Pigments

FDA approved.

A handwritten signature in dark ink is written over a circular stamp. The stamp contains the text "NELSON JAMESON" around the top and "800-826-8302" around the bottom.
