

MAGRABAR[®] SILICONE RELEASE AGENT SE-1335 FG

TECHNICAL INFORMATION

Appearance: Liquid
Opaque white

Typical Properties:

Specific Gravity at 25°C:	0.99
Active Concentration:	35%
Density (Lbs./U.S. Gallons)	8.3
Solubility in Water:	Dispersible
Freezing Point:	32°F

This information is intended as a guideline only and should not be used to issue specifications. Slight deviations do not affect application and capability of the product. For specifications please consult the Certificate of Analysis.

Properties/applications: MAGRABAR SILICONE RELEASE AGENT SE-1335 FG is a 35% active non-ionic silicone emulsion for use as a general-purpose lubricant and release agent. It is certified Kosher Pareve. It may be used in direct food contact applications subject to the limitations of 21 CFR 173.340.

SE-1335 FG prevents sticking of tortillas masa to belts and metal slats in high-temperature ovens. SE-1335 FG will not alter the flavor of tortillas.

SE-1335 FG is a concentrated emulsion. It can be diluted with three parts of water while maintaining its effectiveness. SE-1335 FG contains a preservative to inhibit microbial growth. Dilution will reduce the effectiveness of the preservative. Diluted material stored for more than a few days may require additional preservative.

Storage/handling: SE-1335 FG is temperature sensitive. This product must be protected from freezing.

Keep containers closed when not in use.

Packaging: 5 gallon Pail holding 40 lbs/ 18 kg net
55 gallon Drum holding 450 lbs/ 200 kg net
275 gallon Tote holding 2,200 lbs/ 998 kg net and bulk quantities

Our technical suggestions are based on data from many experiments and cannot represent a warranty of any kind as to their performance in other formulations. Customers must always verify our product's performance in their own systems. This technical data sheet replaces all previous issues.
