

PRODUCT INFORMATION

Item # 1225002

KA - 1.25 Stainless Steel Sediment Tester

Weight: 5 pounds

Capacity: 2-quart funnel

The KA Model is manufactured to meet FDA standards and features a stainless steel funnel and aspirator and is designed for use with the sediment discs. The 2-quart capacity stainless steel funnel has matched disc-locking stem which fits sediment test disc-lock, preventing an fluids from by-passing disc during tests, and permitting easy placement and removal of disc. The adjustable cam valve makes it easy to flush body assembly between tests. Entire assembly is easily dismantled for thorough cleaning.
