

# HALO2 - Wireless pH Testers

## Turn your phone or tablet into a laboratory grade pH Meter.

### Bottom line

Hanna's HALO2 Wireless pH Testers combine the best of both worlds, a pH electrode paired with Bluetooth® 5.0 Wireless Technology. Take laboratory grade pH measurements using a compatible Apple or Android smart device and the Hanna Lab App. Simple and convenient, test literally anywhere! These testers are perfect for collecting measurements out in the field, in a laboratory or classroom environment, or even as part of the food production process. With 15 styles to choose from for various industries, matching a HALO2 Wireless pH Tester to your testing needs is easy.

### Benefits

#### A Top-of-the-Line Testing Solution

HALO2 Wireless pH Testers are equipped with Hanna's professional line of pH electrodes for industry specific applications. Get the versatility you want and need at a reasonable price! With the HALO2 Line, testing with a professional electrode is no longer limited to just a laboratory setting. Its compact design and data logging capabilities enable you to achieve high quality results from wherever you are.

#### Calibration Capabilities

Easily perform a 3-point calibration **without** being connected to the Hanna Lab App and up to a 5-point calibration **with** the Hanna Lab app. In addition, set alarm thresholds and calibration reminders via the app.

#### Trace, Sort, and Share Data

Log pH and temperature measurements every second, tag and annotate measurements, and export into a PDF or CSV format. Visualize and view your measurements on the Hanna Lab App in a graph or table format. Ideal for those performing manual titrations or pH adjustments, all data is tagged with Good Laboratory Practice (GLP) information. This includes calibration buffers used, slope, offset, and date.

#### Optional Open API Integrations

Optional open API integrations for third-party software are available to reduce data entry. The integration potential is endless whether you want to use it for task management software, laboratory notebooks, etc. Just ask us about it!

IP65  
Waterproof

Hanna Lab App  
Compatible

When used with HALO2, the Hanna Lab App turns a compatible smart device into a full-featured pH meter. Functions include calibration, measurement, graphing, datalogging, and data sharing as well as Good Laboratory Practice (GLP) capabilities. Measurement and logging start at one second intervals as soon as HALO2 is connected.
