## SP BEL-ART, H-B FRIO-TEMP BLOOD BANK VERIFICATION THERMOMETER; -5 TO 20C

Catalog No. : B61004-0400  
UPC No. : 191634043089

These mercury free thermometers are traceable to NIST and cover ranges from -5 to 20°C or 20 to 70°F.

- Verify sample temperatures in Blood Bank refrigerators
- Accurate temperature reading without sample contamination is achieved by using the filled bottle (included), which mimics the sample
- Insert thermometer into the bottle and place near the samples for best results
- Thermometers contain organic liquid, or EnviroKleen™ certified Enviro-Safe® liquid; feature permanently fused markings and lead free glass
- PFA coating on select thermometers safely contain glass and liquid in case of breakage
- Manufactured and tested by our USA quality team; individually serialized
- Includes multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy and Traceability
- Should you require an individual Thermometer Calibration Report, factory calibrated thermometers or custom calibration services are available
