

LEADER BOOT ENS

EVACUATING NON-SLIP BOOT

The Leader boot is the most innovative, comfortable industrial safety boot. The ENS Leader Boot - designed, assembled and built in the USA with global components - delivers best in class comfort, durability, exposure resistance, and debris evacuation. The ENS boot combines leading edge proprietary vulcanized rubber and high evacuation / superior non-slip triangle outsole design with unique blended thermoplastic elastomer material to deliver a superior protective industrial boot.

- Class of Material: Vulcanized rubber & thermoplastic elastomer
- Steel Toe exceeds ASTM F2413 M/I/C
- Proprietary vulcanized rubber outsole delivers best in class slip, debris evacuation and abrasion resistance.
- Independent ASTM F3445 slip test results indicate 2.0X more slip protection than 98% of commonly used industrial boots, and 1.4X more than PU boots
- Sneaker Midsole delivers leading edge cushioning and comfort
- High rebound and breathable insole enhances user comfort
- Improves user safety in high or moderate slip conditions. Ideal for Food Processing, Dairy, Construction, Sanitation, Waste Management and more
- Competitive Boots: Servus Brown Dipped Neoprene, Dunlop Purofort series, Shoes For Crews
