

To Whom it May Concern,

The component materials used in AMMEX's Glovework Orange Nitrile Industrial, Diamond Textured, Powder Free Gloves comply with FDA Regulations for Food Contact (21CFR, 170-199), and are manufactured in FDA-inspected and ISO-9002 registered facilities.

The Role of the FDA & USDA in relation to gloves:

The FDA regulates medical grade exam gloves. The FDA inspects facilities, and randomly samples shipments. Our medical grade exam gloves meet, or exceed FDA requirements.

Non-medical gloves, used in a variety of applications such as food service, are also generally manufactured in FDA inspected facilities. Non-medical gloves should be marked "Not for Medical Use" so they are not used in a medical situation where there is a chance for blood borne pathogen exposure.

The USDA regulates what glove material components are permissible for food contact. The USDA does not regulate gloves, and to our knowledge at this time, have any direct glove guidelines. AMMEX gloves comply with CFR 170-199 for food contact.

Please contact your AMMEX Sales or Customer Service Representative at 1-800-274-7354, if you have any questions, issues, or concerns.
