To Whom it May Concern

The component materials used in Ammex gloves comply with FDA Regulations for Food Contact. 21CFR, 170-199.

Manufactured in FDA-inspected and ISO-9002 registered facilities.

Please contact your Ammex Sales or Customer Service Representative at 1-800-274-7354, if you have any questions, issues, or concerns.

The Role of the FDA & USDA in relation to gloves:

The FDA regulates medical grade exam gloves. The FDA inspects facilities and random samples shipments. Our medical grade exam gloves meet or exceed FDA requirements.

Non-medical gloves, used in a variety of applications such as foodservice, are generally manufactured in FDA inspected facilities too. The non-medical gloves should be marked "Not for Medical Use" so they are not used in a medical situation where there is a chance for blood borne pathogen exposure.

The USDA regulates what glove material components are permissible for food contact. The USDA does not regulate gloves and to our knowledge, at this time, have any direct glove guidelines. Ammex gloves comply with CFR 170-199 for food contact.

A handwritten signature in black ink, appearing to read "Keyo Gold", written over a horizontal line.
