Rubbermaid Tilt Truck

Designed for many types of food plant applications—waste containers, finished goods collection, refuse bins and more. Funnel-shaped body directs contents for quick, easy emptying. Ergonomic details, such as molded-in hand grip, give you greater leverage and control. Inset wheel design helps prevent damage to interior building surfaces. They even nest four high for easy storage. Made of USDA and FDA compliant materials. Standard duty.

½ cu.yd. (60 ¼" L x 28" W x 38 ⅝" H)	CAPACITY: 850#

Kitbin Pallets

Engineered for the toughest applications in manufacturing, food processing and distribution, the KitBin® Pallet is constructed to handle dynamic loads of up to 4,000 lbs. The solid smooth top allows for easy clean-up. Made of one-piece HDPE, which is USDA approved for food processing applications. 48"L x 40"W x 5.9"H. Direct ships from manufacturer in MI. Freight charges will apply.

NEW!

MACX® Shipping and Storage Containers

Maximize your food handling efficiency with these stackable, high-density polyethylene structural foam containers. Patented interlocking corners allow you to safely stack up to 10 high. Save storage space and transport costs by nesting three containers. Completely sanitary—can be high-pressure washed and sterilized. Meets USDA/HACCP standards for food product handling.

- Weight capacity: 1500 lbs.
- Volume capacity: 20.4 bushels/190 gallons/25.4 cu. ft.
- Dimensions: 40"L x 48"W x 31"H
- Short side runners for stability. Long side runners units available.
- Direct ships from manufacturer. Freight charges will apply.

Polyethylene Cutting Board

Color-code your cutting boards to avoid cross-contamination. Assign a different color for each specific use. The high-density polyethylene

makes them great for food handling because they resist staining and absorption. A specially designed surface helps keep knives sharp longer. Boards won't crack or chip. Color goes all the way through. NSF listed. Meets USDA and FDA specifications. Custom cut sizes available. Call for more info.

Knobby Rubber Mats

Inexpensive rubber mats designed for heavy wear and tear in almost any environment. Knobby surface on both sides to allow for circulation of air or liquid.

Protects stainless steel parts or glassware from knocking against hard surfaces. Perfect for disassembled pump parts during repairs. White and red mats are formulated from FDA approved materials and have 3/4" reinforced holes die-cut in two corners for easy hanging on stainless steel mat hanger. Mat with black "X" helps prevent cross-contamination. Use the solid colored side for product contact and the side with the "X" as the bottom side. 21" x 27".

PRODUCTS

REMCO Double Blade Ultra Hygiene Squeegee

Made of the same blended rubber as the standard Ultra Hygiene Squeegee but features two blades and a blade cassette for quick and easy blade replacement. Easy to clean and will harbor less bacteria than double foam squeegees. Two rubber blades are more efficient than the regular Ultra Hygiene Squeegee. Unites maximum efficiency with the highest possible food safety. Replacement blade cassette eliminates the need to throw away the entire squeegee when blades wear out. Blades and head are made of the same color for a 'total color' product. Autoclavable at temperatures up to 212°F/100°C. Made from FDA approved materials. Handle sold separately (unless noted otherwise). Order Euro-thread handle on page 15.

Microfiber Wet Mops

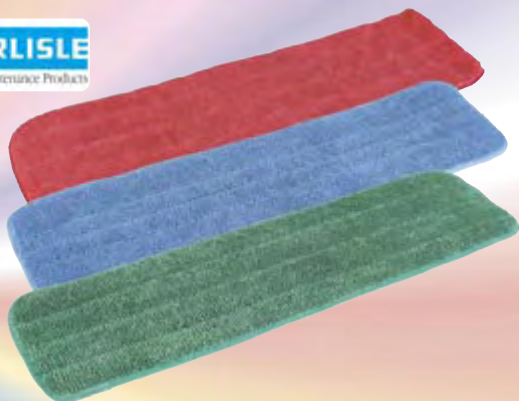

Use to clean floors, walls, ceilings and more. Special looped-end fibers glide over floors for easier mopping without linting. Microfiber fill instead of foam for faster and more thorough drying compared to rags and the common mop—reducing the potential for bacterial, mold and mildew growth inside the very tools you are supposed to be cleaning with. Can also be used for dry mopping and dusting. Use with microfiber aluminum mop heads.

------------------------	-------------------------	--------------------------

Why Microfiber?

Microfiber products can save you significant time, money and labor compared to traditional cleaning tools.

Significantly reduce chemical usage.

- Remove up to 400% more dirt, dust and grime with a single pass.
- Provide effective cleaning after more than 500 uses (use and launder).
- Long product life could save you as much as 60% per year over the cost of traditional alternatives.

Microfiber Dry Mops

Polish as you dust! Ribbed center mat attracts and holds dust like a magnet. Large looped fringe keeps dust from flying and grabs larger particles and debris. Use with microfiber aluminum mop heads.

YARN VARIETIES

Cotton: Good absorption & retention with limited shrinkage and a low initial cost. "Break-in" period required to remove natural oil and gain full absorbency of mop. Slow drying yarn promotes mildew and deterioration. Lints.

Rayon: Absorbs quickly with easy release, however has low water retention making it less effective for general cleaning. Dries fast and is mildew-resistant. Cleaner yarn with less linting. Used primarily in special applications such as floor finishing.

Cotton/Synthetic Blend: Combines high performance with long product life. Cotton fibers provide high water absorption and retention for effective floor drying. Synthetic fibers provide maximum water pick-up and strength for increase product life. No "break-in" required.

CUT-END VS. LOOPED-END MOPS

Cut-End: Most popular, lower purchase prices and perceived to be more economical. But because cut-end mops cannot be laundered they are often thrown away before their lifespan is complete, making their ultimate cost higher. Fray and unravel with use and have a tendency to leave behind loose strands and lint.

Looped-End: Outlast cut-end mops 8 to 1. Offer more superior performance and last longer than cut-end style mops. Prevent fraying and unraveling resulting in reduced labor costs and lower replacement cost.

Cotton Dust Mops

NEW!

Great mop for dust control in industrial applications. Yarn is made of tightly twisted virgin natural cotton. Key-slot style with snaps which are heavy duty, rust resistant and easy to use. Easily launderable.

Mop Bucket and Wringer

Take advantage of substantial savings when you purchase a mop bucket and wringer combo. The WaveBrake™ mop bucket reduces wave motion and the resulting splashing and spilling (up to 40%) caused by transporting a mop bucket. Less water spillage on the floor means less exposure to slip and fall law suits which average \$100,000 per incident. In addition, the new WaveBrake wringers provide 25% more force than old styles. As a result, less strength is needed to wring a mop.

Purchase a dirty water bucket separately to easily capture dirty water, leaving your clean water cleaner.

COLOR-CODED Brush Program Tips

Here are some tips to keep your color-coded brush program effective:

- Separate brushes to avoid cross-contamination.
- Use separate brushes for internal and external surfaces.
- Restrict brushes to their particular zone of use.
- Maintain and store brushes properly.
- Sanitize brushes between uses.

CARLISLE
Sanitary Maintenance Products

Double End Valve & Fitting Brush

Outperforms any other two brushes on the market for plug valve cleaning. The tapered shape and stiff bristles handle any job. The white plastic handle will not swell, splinter or crack. Center grip offers perfect balance and control. Fits all sizes from 1 1/2" to 4" diameter.

19" DOUBLE END VALVE BRUSH

COLOR-CODED Metal Detectable Products

Finally, the benefits of color-coded and metal detectable products in one. Produced from a specially formulated FDA compliant material, these high impact food approved polypropylene tools have the ability to be detected by most metal detection machines used in the food processing industry. We have many other metal detectable products available. Please call for details.

REMCO Metal Detectable Scraper

These scrapers are made of a FDA approved polypropylene resin, which can be easily identified by standard metal detection equipment. The strong, seamless construction ensures there are no areas to harbor bacteria. The handle features a thumb indentation for stronger grip and control and works well for pans, vats, tables or counter tops. Working temperature range: -22°F to 176°F (-30°C to 80°C).

Metal Detectable Plastic Paper Clips

These extra large (3" x 1.5") clips are made of tough and durable metal detectable plastic. They eliminate the need for staples which could cause issues in your processing area. Can be used with a safety chain (364-7047) for added security. Choice of four color clips which can hold up to 40 sheets of paper each. Sold by the pack. 30/pack.

PRODUCTS

Metal Detectable Cable Ties

A unique manufacturing process involving the inclusion of a metallic pigment enables even small pieces of the tie to be detected by standard metal detection and X-ray equipment.

- Suited for electrical cabling applications in areas adjacent to the manufacturing process
- Ideal for bag and sack tying
- Greatly reduces risk of contamination

Available in five colors and several sizes. A 10" releasable cable tie, which can be reused is also available. All ties are fully detectable. 100/pack.

Color-Coded Sign

Mark your own color-coded areas with nine individually colored signs.

Use a permanent marking pen to customize the wording on these signs to match your plant requirements. High-visibility signs clearly indicate that color-coding systems are in place.

7"W X 10"H FIBERGLASS COLOR-CODED SIGN

083-2022 White	083-2021 Red	083-2023 Yellow	083-2025 Blue	083-2024 Green
083-2027 Brown	083-2026 Tan	083-2028 Black	083-2031 Orange	

Tri-Zone Sign

Whatever your system for color-coding, our custom signs can make identification easier. The original Tri-Zone color-coded brush program sign identifies the white (pasteurized product area), red (raw product), yellow (clean up), and black (floor drain only) work zones.

7" W X 10" H FIBERGLASS TRI-ZONE SIGN 083-2003
