High-Visibility Compliance & Performance Classes

ANSI/ISEA 107 breaks down high-visibility apparel into Types and Performance Classes. The environment in which the worker is wearing the garment dictates the type selected, while the performance classes provide a range of design options that correspond with the level of risk and the certified high-vis material and certified reflective tape needs of the wearer.

TYPES		PERFORMANCE CLASSES	
Type O (Off-Road) For workers in occupational environments which pose struck-by hazards from moving vehicles, equipment, and machinery, but which will not include exposure to traffic on public access highways. <i>Examples include: workers exposed to the hazards of warehouse equipment traffic.</i>		Class 1 (Type O) Offers a minimal amount of high-vis material.	
Type R (Roadway) For workers in occupational environments which include exposure to traffic (vehicles using the highway for purposes of travel). <i>Examples include: roadway construction workers and school crossing guards.</i>		Class 2 (Type R or P) Will have additional amounts of high-vis material. Typically a standard vest but can also be any garment that does not have reflective tape on the sleeves.	
		Class 3 (Type R or P) Provides more visibility to the wearer in both complex backgrounds and through a full range of movement by the required placement of background, and reflective tape that fully encircles the sleeves and pant legs (if present).	
Type P (Public Safety) For emergency and incident responders and law enforcement personnel in occupational environments which include exposure to traffic. <i>Examples include: law enforcement and emergency response, firefighting, and road closure personnel.</i>		Class E Not a performance class. Only intended to be worn with Class 2 or Class 3 garments. When combined with a Class 2 garment, the wearer is now Class 3. When worn alone, Class E is not a recognized high-visibility garment.	

Job Sight™ High-Vis Sweatshirts

Job Sight™ high-visibility sweatshirts are constructed of a comfortable, high-density polyester material.

Pullover Hoodies

- 2" silver reflective tape on the front and back with fluorescent background for excellent visibility.
