Welcome to Nelson-Jameson

While most suppliers simply deliver products—Nelson-Jameson delivers solutions. Our comprehensive product offerings and expertly curated food safety programs can help lower your transaction costs while providing the products and services you need to produce safe, quality food.

Supplier consolidation

Nelson-Jameson sources over 55,000 products—both Direct and Indirect—specifically with the food processor in mind. By providing the widest possible range of products from a single source, we can help improve your business efficiencies. And since we represent over hundreds of manufacturers, we can easily reduce the number of vendors you have to work with.

Our diverse product categories:

- Process Equipment
- Sanitary PVF & Accessories
- Process Systems Repair Parts
- Safety & PPE Products
- Sanitary Maintenance (Jansan)
- Cleaning Equipment & Tools
- Material Handling
- Lab Equipment & Instrumentation
- Lab Supplies & Accessories
- Building & Facility Maintenance
- Bulk Packaging Products
- Ingredients
- Cleaning Chemicals

Nelson-Jameson is truly the food processor's "one-stop shop"—**providing the convenience of one order, one shipment, and one invoice.**

Food industry expertise

For 75 years, Nelson-Jameson has been a trusted source of food and dairy processing supplies. Our commitment to service is unique; **we know that there's more to a business relationship than just the supply of products.**

That's why Nelson-Jameson strives to go beyond the service level of our competitors. Our Account Managers, Technical Sales Team, and Product Managers are passionately dedicated to ensuring the safety and quality of your finished product. This collaborative approach offers unparalleled support for all of Nelson-Jameson's Direct and Indirect product solutions.

Nelson-Jameson's product departments are organized to serve every area of your plant: Receiving/Raw Materials, Processing/Production, QC Lab/Test Kitchen, Packaging, Warehouse, Employee Lounge/Office, and Plant Exterior. Our product specialists are available to discuss **custom solutions based upon Nelson-Jameson's food safety programs**—developed specifically for food and dairy processors and inspired by FSMA, regulatory bodies, and the latest research in food safety and quality.

Color-coded trainings & assessments

Training programs are another way Nelson-Jameson is committed to bringing value to our customers.

Through the guidance of experts, learn how to select the right cleaning tools, how to properly maintain and care for tools, and best practices to store tools.

Complimentary customized assessments will aim to identify and solve potential hygiene and sanitation issues based on your facility's cleaning and material handling tools.

Contact our Product Specialists to schedule your training and site assessments!

Interested in additional educational opportunities? Our manufacturer partners have developed a variety of courses designed to offer valuable instruction that employees can use in the plant. Ask us for more information today!

Procurement & inventory management

Nelson-Jameson understands the critical need to have the right products available when you need them. That's why we have developed **custom managed inventory and ordering solutions built for the food industry.** We will work with you to develop the program that best fits your needs. Our robust E-procurement capabilities include EDI and PunchOut; as well as integration abilities with Ariba, Oracle, and other procurement platforms. Nelson-Jameson can also offer corporate pricing, stocking agreements, standing orders, and **documented cost savings programs.**

Connect today with our customer solution team to uncover cost savings opportunities for your facility.

Vikan® UST Hand Brush

Features outwardly flared filaments to effectively clean in corners, junctions, and other hard-to-reach areas. Stiff filaments provide a stable platform, allowing users to apply extra pressure to heavy soils. Ergonomically designed brush block prevents slipping in the hand and reduces wrist strain. Enhanced Bristle Security Units are directly molded to the brush block—effectively removing any gaps or seams while offering unprecedented bristle retention strength. Hang hole allows for convenient drying and storage. Made from FDA-compliant materials. For more information on UST see page 6.

Ultra safe technology Vikan® UST brooms & brushes

What is Ultra Safe Technology (UST)?

UST is an innovative line of brooms and brushes that utilizes enhanced Bristle Security Units directly molded to the brush block, effectively removing any gaps or seams while offering unprecedented bristle retention strength.

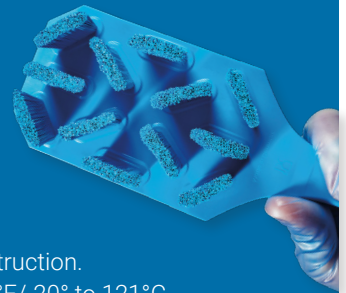

UST provides food processors the confidence that bacteria and foreign contaminants will not hide in and around the tools—for an outstanding alternative to resin set brush products.

Each UST brush and broom features a purpose-designed, efficiency-boosting bristle pattern to optimize function.

Features & benefits:

- Enhanced bristle security.
- No metal staples or resin.
- High cleaning efficacy.
- Easy to clean and dry.
- Easy visual inspection.
- FDA-compliant.
- Fully tested and documented.
- Strong, durable, and light construction.
- Temperature rating: -2° to 250°F/-20° to 121°C.

Ultra Safe
Technology

ColorCore Scrub Brush

Vikan® Small Utility Brush

Small and lightweight, this brush has a broad head and an ergonomically angled handle making it ideal for cleaning small surface areas on production equipment, tables, and more. Design raises user's hand from the cleaning surface, reducing the risk of injury. Medium polyester bristles won't scratch surfaces. Made from FDA-compliant materials. Autoclavable at temperatures up to 250°F/121°C.

Bristle options:

Soft—Longer and thinner than other types; ideal for sweeping dry or fine debris.

Medium—Suitable for wet and dry applications; great for sweeping larger particles.

Stiff—Shorter or thicker; perfect for scrubbing difficult dirt and for wet use with cleaning agents.

Soft/Stiff Combo—Stiff bristles that loosen stubborn debris and soft bristles that sweep away fine particles.

Soft/Split or Flagged—Bristles with split ends; split bristles hold more water and cleaning agent to achieve a maximum wash effect. Works effectively with fine debris.

Brushes

Sparta® Hook CIP Brush

SPARTA

Clean the tops and sides of up to 4" pipes with ease. Medium polyester bristles are twisted in heavy-duty wire with an extra-heavy fill for thorough cleaning. 5" handle can be used as is, or screwed into a longer handle for overhead work. Use with any standard thread handle sold separately on pages 25 to 26.

Vikan® Edge Bench Brush

Features a smooth, ergonomically designed handle with polyester bristles. The soft bristles are designed for brushing dry, fine particles such as dust, powders, flour, or icing sugar, while the medium strength bristles remove moist or medium-sized particles such as sugar, chocolate, pastry, or vegetable peelings. Also commonly used as a dustpan brush on floors. Made from FDA-compliant materials, and autoclavable at temperatures up to 250°F/121°C.

Vikan® Bottle Brush

NEW

This brush features more fill than the previous version to hold even more cleaning solution for efficient cleaning. The stiff polyester bristles allow the brush to withstand harsh cleaning applications on metal, nylon, PVC, or stainless steel. A one-piece, ergonomically designed handle provides improved control and comfort, while the smooth surface minimizes possible contamination areas for bacteria to grow. It is dishwasher-safe and autoclavable.

Vikan® UST Tank Brush

Seamless design minimizes foreign body risks and reduces the chance of product contamination. Enhanced Bristle Security Units are directly molded to the brush block, effectively removing any gaps or seams while offering unprecedented bristle retention strength. The oval shape and curved bristles optimize cleaning in bulk tanks and curved bins, while the lightweight, compact design reduces user fatigue. The brush's hygienic design, with drainage holes and smooth surfaces, reducing areas for bacteria to harbor. Meets hygienic design requirements by GFSI-benchmarked standards, FDA 21 CFR, and EU 10/2011 regulations. Use with Euro-thread handle sold separately on pages 27 to 28.

Sparta® Spectrum® Aluminum Brush Rack

SPARTA®

Hang brushes on a rack in their color-coded zone to maintain bristles for cleaning effectively. These peg-type racks are made from heavy-gauge anodized aluminum with solid aluminum pegs. The offset design and peg angle help keep brushes away from wall. Holes are 16" on center to fit standard wall studs. Screws included for mounting on brick or concrete.

17"L x 2"W x 4"H

Vikan® Grout Brush

Features an arrow shaped bristle design, which is ideal for cleaning under equipment, corners, and other hard-to-reach areas. The middle row of polyester bristles are stiffer than the filament bundles on the sides to help clean grout and other difficult areas. The neck allows for 180° of rotation and requires a maximum 6" clearance to fit under equipment. Made from FDA-compliant materials. Autoclavable at temperatures up to 250°F/121°C. Use with Euro-thread handles sold separately on pages 27 to 28.

Tips for an effective color-coded brush program

- Separate brushes to avoid contamination.
- Use separate brushes for internal and external surfaces.
- Restrict brushes to their particular zone of use.
- Maintain and store brushes properly.
- Clean and sanitize brushes between uses.
- Reinforce color assignments with consistent and appropriate signage.
- Provide clearly marked storage areas for tools throughout your facility.

Vikan® Adjustable Angle Wall & Floor Brush

Unique brush features soft split fiber bristles to absorb liquid so that the user can efficiently carry cleaning solution from the bucket to surface being cleaned. Commonly used as a dusting brush with its adjustable neck angle and super soft polyester bristles. Made from FDA-compliant materials. Autoclavable at temperatures up to 250°F/121°C. Use with Euro-thread handles sold separately on pages 27 to 28.

Choose the handle material that best fits your application

Ultra Hygiene - Composed solely of FDA-compliant polypropylene, this handle is uniquely hygienic and durable in its construction. It also boasts the added benefit of coming in total color, making it an excellent choice for inclusion in a color-coding system.

Aluminum - Aluminum handles are a good option in any hygiene sensitive environment. Aluminum provides a cost-effective and reliable solution to a facilities needs.

Stainless Steel - Stainless steel handles can hold up to the most aggressive chemicals, making them a great choice for environments where chemical resistance is critical.

Fiberglass - Fiberglass handles are a total color alternative when hygiene is not most critical.

Vikan® Fixed Head Squeegee

Features a durable polypropylene head with double foam blade for superior cleaning. Blades are held in place with a locking cassette for quick and easy replacement. Blade cassettes are available with black or white blades. Squeegees with white foam cassettes are made from FDA-compliant materials. Use with Euro-thread handles sold separately on pages 27 to 28.

Microfiber Mop Heads & Handle

Use with wet or dry microfiber mops. The lightweight aluminum mop heads have replaceable hook and loop strips, while the deluxe heavy-duty plastic frames are built to withstand the toughest of environments. The contour frame is made of flexible material to easily clean curved equipment surfaces, corners, and more. All frames accept the aluminum handle which telescopes from 38" to 71". Mops, heads, and handles sold separately.

Microfiber Wet Mop

Use to clean floors, walls, ceilings, and more. The special looped-end fibers glide over floors for easier mopping without linting. Microfiber fill instead of foam allows for faster and more thorough drying compared to rags and the common mop—reducing the potential for bacterial, mold, and mildew growth inside the very tools you are supposed to be cleaning with. Can also be used for dry mopping and dusting. Use with microfiber mop heads and handle.

Why microfiber?

Microfiber products can save you significant time, money, and labor compared to traditional cleaning tools.

- Significantly reduce chemical usage.
- Remove up to 400% more dirt, dust, and grime with a single pass.
- Provide effective cleaning after more than 500 uses (use and launder).
- Long product life could save you as much as 60% per year over the cost of traditional alternative.

Microfiber Cleaning & Polishing Cloth

Terry cloths work better and last longer than cotton rags. Their microfiber loops hold dirt and grease without redepositing. The suede polishing cloth is ideal for cleaning mirrors, windows, stainless steel, or other metallic surfaces. Rinse clean and dry fast. Washable for repeated use.

Blended Looped-End Wet Mop

Looped-end mops provide superior performance and last longer than cut-end style mops—outlast cut end mops 8 to 1. The cotton/synthetic blended yarn combines high-performance with long product life, and the looped-end prevents fraying and unraveling, resulting in reduced labor costs. Not launderable. 12/case.

Yarn varieties

Cotton:

Good absorption and retention with limited shrinkage and a low initial cost. "Break-in" period required to remove natural oil and gain full absorbency of mop. Slow drying yarn promotes mildew and deterioration. Lints.

Rayon:

Absorbs quickly with easy release, however has low water retention making it less effective for general cleaning. Dries fast and is mildew resistant. Cleaner yarn with less linting. Used primarily in special applications such as floor finishing.

Cotton/synthetic blend:

Combines high-performance with long product life. Cotton fibers provide high water absorption and retention for effective floor drying. Synthetic fibers provide maximum water pick-up and strength for increased product life. No "break-in" required.

Cut-end vs. looped-end mops

Cut-end:

Most popular, lower purchase prices, and perceived to be more economical. But because cut-end mops cannot be laundered they are often thrown away before their lifespan is complete, making their ultimate cost higher. Fray and unravel with use and have a tendency to leave behind loose strands and lint.

Looped-end:

Outlast cut-end mops 8 to 1. Offer more superior performance and last longer than cut-end style mops. Prevent fraying and unraveling resulting in reduced labor costs and lower replacement cost.

Wet Mop Handles

Sparta® Fiberglass Jaw Style Wet Mop Handle

Securely holds wet mops in place for effective cleaning. Features a swivel hang-up cap for easy storing and plastic head. Use with 5" wide band mops sold separately.

Mop heads

Quick release

Flexible plastic head with hinged gripper "bites" into any size mop band and secures it for maximum performance.

Jaw style

Designed to be used with wide-band mesh headbands. "Bites" into mop for a secure hold and precision handling.

Wet mop care

Proper care of a mop head from the moment it is received is important to ensure its longevity and effectiveness. Follow the suggestions below to best care for wet mops.

1. Soak new mop heads in a warm, mild detergent solution for at least twenty minutes to break them in.
2. Avoid using the top portion of the mop for scrubbing, as this can cause strands to tear and shorten the mop's lifespan.
3. Avoid using strong cleaning solutions such as lye, bleach, or caustics as they can cause strands to break more quickly.
4. When mopping a rough surface, mop in a direction that minimizes snagging. If possible, reserve one particular mop for these surfaces.
5. Trim any loose strands to avoid snagging and splattering.
6. Remember to thoroughly rinse and wring out mops after each use.
7. Store mops with the strands hanging down in a warm, dry, and well-circulated area.
8. Regularly check and replace worn-out mop heads, as lost strands can reduce the mop's effectiveness. If a mop is only 75% of its original weight, it will take an additional 1/3 of the usual time to complete the job.

Sparta® Omnifit™ Mop Bucket SPARTA®

Sturdy construction made from corrosion resistant polyethylene. Non-marking, swivel casters provide convenient and mess-free mobility over smooth floor surfaces. Features anti-splash technology—reducing the risk of spilling and splashing. Ergonomic wringer handle allows for easy mobility and pressing. Consistent commercial use wringer is rated for 200,000 cycles. Available in six colors to support your color-coding program. 35-Quart capacity.

Vikan® Nylon Scraper with Threaded Handle

Ideal for loosening stubborn deposits like bakery debris, hardened chocolate, or burnt on food on smooth surfaces.

The nylon blade is a good alternative to a stainless steel blade and can be used on sensitive surfaces to avoid scratches on equipment and conveyor belts. This hard blade scraper can withstand hot surfaces, up to 347°F, when used for a maximum of two minutes. Use with Euro-thread handles to greatly extend the user's reach, sold separately on pages 27 to 28.

Sparta® Bronco™ Round Container & Lid

Heavy-duty with double-reinforced stress ribs and drag skids for ultimate durability in any application. Stackable design for easy storing and integrated bag cinches help hold liners in place. Comfort curve handles on each side allows for easy lifting and prevents vacuum sealing when stacking. Features bottom ergonomic hand holds for efficient emptying. Container base notches securely attach to a wheeled dolly (sold separately). Locking, press-pull lids are designed to prevent water from collecting—reducing the risk of bacteria growth (sold separately).

All colors are NSF 2 and NSF 21 certified for food contact and cleanliness.

Don't forget to order your trash can liners

Make sure you find the right sized liner for your container.

If your liner is too large, and hangs over the side of your trash can, it is wasted money and plastic. A too-small liner will fall into the can.

To learn more, request our Container & Liner Buying Guide

NEW

Akro-Mils® Nesting Storage Shelf Bin

Constructed of durable industrial-grade plastic can be fully loaded without bulging or cracking. Designed to nest inside each other for convenient stacking when not in use. Divider slots allow for more storage options (dividers sold separately). Features a built-in rear hang lock, which allows bins to tilt out for complete access, while hooking onto a shelf to prevent spills. The one-piece construction is waterproof and corrosion-proof against weak acids and alkalis.

Akro-Mils® Super-Size AkroBins® Stackable Storage Shelf Bin

The super-sized bins offer huge storage capacity and the versatility to make the most out of your space. These heavy-duty plastic storage bins save space by securely stacking atop each other, and sitting on wire shelving and steel shelving, or steel carts and dollies. The one-piece plastic construction is water, rust and corrosion-proof against weak acids and alkalis.

Sani-Box® Bulk Bin

Maximize sanitary food handling practices at your plant with the industry's most hygienic bulk container design. Eliminates the sidewall seams, gaps, holes, and other bacteria traps associated with other plastic bulk boxes. A seamless FDA-compliant high-density polyethylene (HDPE) construction has been meticulously configured so liquid residue is unable to pool or collect on any exterior container surface. Standard bin has a drain plug and a self-draining bottom to ensure any leftover interior residue drains completely without workers having to tilt, tip, or dump the container during the cleaning process. Other options include: Without a drain or with runners, please call us for details. Direct ships from manufacturer, freight charges will apply. Other lid colors available upon request. *Minimum order of 10 bins.

- Dimensions: 40"L x 48"W x 31"H
- Weight capacity: 1500-lbs
- Volume capacity: 180-gallons/24 cu. ft.

Dri-Dek® Interlocking Flooring Tiles

NEW

Interlocking tiles easily snap together, creating a portable surface suitable for various applications. They can be installed around machinery, equipment, or workbenches, allowing you to define different work zones using various designs and colors. Each tile is treated with oxy-B1™ fungicide, helping combat mold, mildew, and bacteria. Cleaning is simple, just hose them down, and dirt and debris will fall through the anti-skid surface to drain away.

Color-coding in the lab

Color can be an important visual cue in the lab. While some of these products do not fit our traditional definition of "color-coded," we know that color is helpful to make sure you have the right sample for your test or laboratory application.

Plastic Vials

Aseptic dairy vials prevent leaks with a triple seal lid and are ergonomically designed for all of your sampling needs. The vials meet all USDA dye test requirements, as well as the Federal Milk and Marketing Administration, FDA, and the Pasteurized Milk Ordinance (PMO) standards. Made of food grade, non-toxic polypropylene. Manufactured in an NCIMS listed facility. 600/case. 3-oz and 4-oz colored vials are also available.

2-oz

Macro™ Pipette Controller

Help prevent cross-contamination in your lab and also keep your instruments in their designated areas by using color-coded instruments. This color-coded pipette controller, available in four colors, is a great option. An ergonomic alternative to rubber pipette bulbs and other manual aspiration devices, the macro pipette controller provides precise one-finger meniscus control. The membrane filter (included) reduces cross-contamination. Accommodates pipets from 0.1 to 200 mL. Fully autoclavable.

Switch-Grid™ Test Tube Rack with Colored Grid

Innovative, split-frame rack holds up to two different size tubes in the same rack and allows users to quickly switch grids to hold other sizes as needed. Each rack frame includes a set of grids in one size. Grid sets in alternate sizes can be purchased separately.

- 10 mm to 30 mm diameter test tubes fit in five color-coded grid inserts.
- Save storage; additional grid size can be purchased separately. No need to purchase several different size racks.
- Three tier rack holds tubes securely in place.
- Chemical resistant polyoxymethylene plastic rack frame and grids can be cleaned with mild detergent, ethanol, or isopropyl alcohol; autoclaved at 250°F (121°C).
- Rubber feet keep racks from sliding on benchtop; provide secure stacking while in storage.
- Rack frame overall dimensions: 12-1/2" L x 4-3/8" W x 2-5/8" H.

Tingley Flite® Boots

TINGLEY
est. 1998

A revolution in protective footwear—made from EVA material, these boots are 40% lighter compared to most steel toe PVC and rubber knee boots, making them anti-fatigue for wearers. The durable, seamless upper is 100% liquid proof, while the slip resistant, nitrile rubber outsole spits out debris for slip resistance on dry, wet, and contaminated surfaces. Features a 15" height with Calf-Relief Topline (CRT™) for roomier calf space and easier on/off, a beveled heel for reduced back and leg strain, and tread wear indicators to show when half the tread has worn away. Superior chemical resistance to fats, oils, hydrocarbons, certain acids, and caustics make Flite an excellent choice for food processing and chemical applications. Available with a Chevron-Plus® Outsole for slip resistance on wet-contaminated surfaces, a Cleated Outsole for grip on indoor and outdoor surfaces or Safety-Loc Outsole for slip resistance on wet, non-contaminated surfaces. Composite safety toe meets ASTM F2413 M I/75 and C/75 EH and will not set off metal detectors.

Dunlop® FoodPro Purofort® Safety Boots

DUNLOP
PROTECTIVE FOOTWEAR

A new generation of Purofort boots designed for the food processing industry. These polyurethane steel toe boots feature all the benefits of Purofort technology, in addition to a multigrip outsole that can be used in a multitude of varying slip environments; mainly the semi-solid contaminated areas. Additionally, the outsole of the multigrip is extra dirt-repellent. The FoodPro has been developed in such a way that it stays clean even longer, and the surface of the shaft and design of the boot are extra smooth, making the boot much easier to clean.

Tingley Boot Saver® Shoe Covers

Prevent cross-contamination with these high-quality, disposable shoe covers. Made from natural rubber latex, Boot Saver Shoe Covers are highly elastic and easily stretch over primary footwear. Resists a wide range of chemicals and fats, and provides a barrier from liquids and other contaminants. The textured outsole grips on both wet and dry surfaces, while the powder-free finish eliminates concerns about powder contamination. Choose from four colors to meet all your color-coding requirements. Available in sizes medium to 2XL to fit men's footwear sizes 7 to 15. 100 pair/case.

Reflective Safety Marking Tape

Made of engineer-grade material with "bounceback" reflectivity for improved daytime, low-light, and nighttime visibility. Ideal for creating clear, long-lasting markings on tools, equipment, and surfaces. The 5.5 mil thick urethane tape with strong adhesive securely bonds to clean walls, floors, and pipes. Its waterproof and wear-resistant design, combined with chemical resistance, ensures lasting performance.

5S Shadow Boards

Organize tools and supplies efficiently with designated spaces on color-coded shadow boards. Ideal for non-food and general maintenance areas. Choose from a variety of materials and board colors for quick tool location. The subsurface ink will not chip, peel, or deteriorate, and is pressure washable.

AccuFORMNMC
Justrite Safety Group

Materials

Accu-Shield™

Best suited for harsh environments. The two-ply polycarbonate plastic with industrial-strength backing offers durability and strength. A non-glare surface reduces eye strain. Resistant to fading, chemicals, corrosion, abrasions, cracking, and chipping. Temperature range: polycarbonate -60° to 260°F, backing -40° to 176°F.

Accushield™ FB-X

A durable, long-lasting material specifically designed to withstand tough use in the food and beverage industry, it maintains optical clarity after repeated washdowns and is safe for food contact up to 212°F.

Ultra Aluma-Lite™

A 40% lighter weight material than solid aluminum, offering the same durability and rigidity. Features Sign Muscle® top-coating for impact-resistance. Designed to withstand harsh conditions both indoors and outdoors and be resistant to flexing, corrosion, chemicals, and abrasions. Temperature range: -40° to 176°F.

Max-Duty Aluminum

Built to withstand harsh conditions with excellent structural support. A lightweight metal offers easier handling and installation. Resists rust and deterioration. Temperature range: -40° to 250°F.

Dry Zone Boards

Enhance your 5S system with customized shadow boards

Shadow boards are an effective way to visually communicate throughout a facility and maintain a successful 5S System.

Features:

- Reduces the time away from the workstation by providing a designated place for specific tools within reach of operatives.
- Incorporate color-coding to keep food-contact, non-food-contact, and allergens in separate zones.
- Improves safety and speeds up processes by extending the life of equipment and eliminating missing tools.

Vikan® HyGo Mobile Cleaning Station

A compact, ergonomically designed cleaning cart offers a comfortable user experience and easy maneuverability. It features a smooth surface finish and rounded edges, eliminating areas for bacteria to harbor. Customizable tool storage on the front and back with easy-mounting tool brackets, capable of holding up to 12 tools with additional components (sold separately). Constructed from EU and FDA food contact-compliant raw materials.

We offer the most diverse and extensive collection of color-coded products in the industry

A complete color-coded system helps promote organization and efficient work flow. Designating critical control areas and zones helps your sanitation program by ensuring that the tools stay in the areas in which they are meant to be used, doing jobs they are meant to do. Color-coded systems also help avoid bacterial and allergen migration within a facility, allowing you to maintain a safe food processing facility.
