WELCOME to Nelson-Jameson.

While most suppliers simply deliver products—Nelson-Jameson delivers solutions. Our comprehensive product offerings and expertly curated food safety programs can help lower your transaction costs while providing the products and services you need to produce safe, quality food.

Supplier Consolidation

Nelson-Jameson sources over 55,000 products—both Direct and Indirect—specifically with the food processor in mind. By providing the widest possible range of products from a single source, we can help improve your business efficiencies. And since we represent over hundreds of manufacturers, we can easily reduce the number of vendors you have to work with.

Our diverse product categories:

- Process Equipment
- Sanitary PVF & Accessories
- Process Systems Repair Parts
- Mechanical Power Transmission
- Safety Products
- Sanitary Maintenance (Jansan)
- Material Handling
- Lab Equipment & Instrumentation
- Lab Supplies & Accessories
- Building & Facility Maintenance
- Bulk Packaging Products
- Ingredients
- Cleaning Chemicals

Nelson-Jameson is truly the food processor's "one stop shop"—**providing the convenience of one order, one shipment, and one invoice.**

Food Industry Expertise

For 75 years, Nelson-Jameson has been a trusted source of food and dairy processing supplies. Our commitment to service is unique; **we know that there's more to a business relationship than just the supply of products.**

That's why Nelson-Jameson strives to go beyond the service level of our competitors. Our Account Managers, Technical Sales Team, and Product Managers are passionately dedicated to ensuring the safety and quality of your finished product. This collaborative approach offers unparalleled support for all of Nelson-Jameson's Direct and Indirect product solutions.

Nelson-Jameson's product departments are organized to serve every area of your plant: Receiving/Raw Materials, Processing/Production, QC Lab/Test Kitchen, Packaging, Warehouse, Employee Lounge/Office, and Plant Exterior. Our product specialists are available to discuss **custom solutions based upon Nelson-Jameson's food safety programs**—developed specifically for food and dairy processors and inspired by FSMA, regulatory bodies, and the latest research in food safety and quality.

Color-Coded Trainings & Assessments

Training programs are another way Nelson-Jameson is committed to bringing value to our customers.

Through the guidance of experts, learn how to select the right cleaning tools, how to properly maintain and care for tools, and best practices to store tools.

Complimentary customized assessments will aim to identify and solve potential hygiene and sanitation issues based on your facility's cleaning and material handling tools.

Contact our Product Specialists to schedule your training and site assessments!

Interested in additional educational opportunities? Our manufacturer partners have developed a variety of courses designed to offer valuable instruction that employees can use in the plant. Ask us for more information today!

Procurement & Inventory Management

Nelson-Jameson understands the critical need to have the right products available when you need them. That's why we have developed **custom managed inventory and ordering solutions built for the food industry.** We will work with you to develop the program that best fits your needs. Our robust E-procurement capabilities include EDI and PunchOut; as well as integration abilities with Ariba, Oracle, and other procurement platforms. Nelson-Jameson can also offer corporate pricing, stocking agreements, standing orders, and **documented cost savings programs.**

Connect today with our customer solution team to uncover cost savings opportunities for your facility.

Brushes

NEW

The angled and circular arrangements of the Bristle Security Units ensure efficient cleaning.

UST HAND BRUSH

Features outwardly flared filaments to effectively clean in corners, junctions, and other hard-to-reach areas. Stiff filaments provide a stable platform, allowing users to apply extra pressure to heavy soils. Ergonomically designed brush block prevents slipping in the hand and reduces wrist strain. Enhanced Bristle Security Units are directly molded to the brush block—effectively removing any gaps or seams while offering unprecedented bristle retention strength. Hang hole allows for convenient drying and storage. Made from FDA-compliant materials. For more information on UST see page 11.

6.9" OAL, 2.5"W, 1.4" Trim

SHORT HANDLE WASHING BRUSH WITH SOFT BRISTLES

Features a comfortable grip, allowing the user to work for longer times without fatigue. Soft/flagged bristles are great for sensitive areas like stainless steel, glass, or acrylic surfaces. Soft/unflagged bristles are perfect for cleaning fragile surfaces such as glass—also suitable for coating products, e.g. cheese with wax. Bristles retain water and chemicals well.

Flagged 10.6" OAL, 2.8"W, 1.6" Trim

BRISTLE OPTIONS:

Soft—Longer and thinner than other types; ideal for sweeping dry or fine debris.

Medium—Suitable for wet and dry applications; great for sweeping larger particles.

Stiff—Shorter or thicker; perfect for scrubbing difficult dirt and for wet use with cleaning agents.

Soft/Stiff Combo—Stiff bristles that loosen stubborn debris and soft bristles that sweep away fine particles.

Soft/Split or Flagged—Bristles with split ends; split bristles hold more water and cleaning agent to achieve a maximum wash effect. Works effectively with fine debris.

Brushes

ULTRA SAFE TECHNOLOGY BROOMS AND BRUSHES

WHAT IS ULTRA SAFE TECHNOLOGY (UST)?

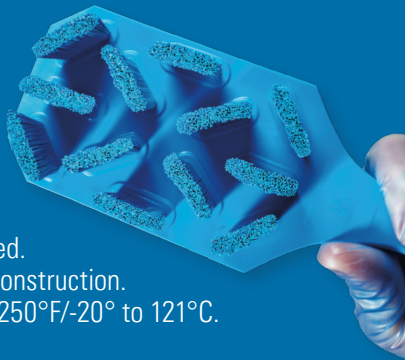

UST is an innovative line of brooms and brushes that utilizes enhanced Bristle Security Units directly molded to the brush block, effectively removing any gaps or seams while offering unprecedented bristle retention strength.

UST provides food processors the confidence that bacteria and foreign contaminants will not hide in and around the tools—for an outstanding alternative to resin set brush products.

Each UST brush and broom features a purpose-designed, efficiency-boosting bristle pattern to optimize function.

Features & Benefits:

- Enhanced bristle security.
- No metal staples or resin.
- High cleaning efficacy.
- Easy to clean and dry.
- Easy visual inspection.
- FDA-compliant.
- Fully tested and documented.
- Strong, durable, and light construction.
- Temperature rating: -2° to 250°F/-20° to 121°C.

ULTRA-SLIM WAND BRUSH

Features extra stiff first bristles and medium on the rest for optimal efficiency. The scraping edge offers assistance with stubborn debris while the slim style allows this brush to get in places that other brushes cannot.

23.6" OAL, 0.6"W, 1.6" Trim

NEW

DUSTPAN BROOM WITH ANGLED THREAD

A very effective, lightweight broom that can be used for sweeping both dry and wet debris. Designed with 2 bristle diameters—the outer row of bristles is softer than the middle row, which gives a very effective sweeping quality. Features a scraping edge to loosen stubborn debris and angled bristles to facilitate sweeping close to walls and corners. Autoclavable at temperatures up to 250°F/121°C.

9.8" OAL, 1.2"W, 2.3" Trim

CEILING SQUEEGEE

Removal of ceiling condensation has always been a nuisance, relying on a variety of fixes. This specialized squeegee removes and captures condensation effectively making it ideal for smooth surface ceiling applications. Self-drains into a telescopic handle. Handles feature either a 32-oz bottle to collect liquid or drain end to attach to a hose. Handle and hose sold separately. Squeegee made of FDA-compliant materials, and autoclavable.

SINGLE BLADE ULTRA HYGIENE SQUEEGEE

Fully molded single-blade squeegee is ideal for use in areas requiring the highest level of hygiene. The improved design features smooth and rounded surfaces, which provide better hygiene and easier cleaning, while the elongated body reduces wear and tear on the ends of the flexible rubber blade to enhance durability and efficiency. Made from FDA-compliant materials, and autoclavable at temperatures up to 250°F/121°C. Use with Euro-thread handle sold separately on pages 26 to 27 unless otherwise noted below.

DOUBLE BLADE ULTRA HYGIENE SQUEEGEE

Made of the same blended rubber as the standard Ultra Hygiene Squeegee, but features two blades and a blade cassette for quick and easy blade replacement. Easy to clean and will harbor less bacteria than double foam squeegees. Unites maximum efficiency with the highest possible food safety, as replacement blade cassettes eliminate the need to throw away the entire squeegee when blades wear out. Made from FDA-compliant materials, and autoclavable at temperatures up to 212°F/100°C. Use with Euro-thread handle sold separately on pages 26 to 27.

COLORCORE SINGLE BLADE SQUEEGEE

Single blade rubber squeegee effectively removes liquids and cleans floors. Made of FDA-compliant materials and can withstand temperatures ranging from -4° to 176°F. Use with Euro-thread handles sold separately on pages 26 to 27.

MICROFIBER MOP HEADS & HANDLE

Use with wet or dry microfiber mops. The lightweight aluminum mop heads have replaceable hook and loop strips, while the deluxe heavy-duty plastic frames are built to withstand the toughest of environments. The contour frame is made of flexible material to easily clean curved equipment surfaces, corners, and more. All frames accept the aluminum handle which telescopes from 38" to 71". Mops, heads, and handles sold separately.

MICROFIBER WET MOP

Use to clean floors, walls, ceilings, and more. The special looped-end fibers glide over floors for easier mopping without linting. Microfiber fill instead of foam allows for faster and more thorough drying compared to rags and the common mop—reducing the potential for bacterial, mold, and mildew growth inside the very tools you are supposed to be cleaning with. Can also be used for dry mopping and dusting. Use with microfiber mop heads and handle.

WHY MICROFIBER?

Microfiber products can save you significant time, money, and labor compared to traditional cleaning tools.

- Significantly reduce chemical usage.
- Remove up to 400% more dirt, dust, and grime with a single pass.
- Provide effective cleaning after more than 500 uses (use and launder).
- Long product life could save you as much as 60% per year over the cost of traditional alternative.

MICROFIBER DRY MOP

Polish as you dust! The ribbed center mat attracts and holds dust like a magnet, while the large looped fringe keeps dust from flying and grabs larger particles and debris. Use with microfiber mop heads and handle.

MICROFIBER CLEANING & POLISHING CLOTH

Terry cloths work better and last longer than cotton rags. Their microfiber loops hold dirt and grease without redepositing. The suede polishing cloth is ideal for cleaning mirrors, windows, stainless steel, or other metallic surfaces. Rinse clean and dry fast. Washable for repeated use.

YARN VARIETIES

Cotton: Good absorption and retention with limited shrinkage and a low initial cost. "Break-in" period required to remove natural oil and gain full absorbency of mop. Slow drying yarn promotes mildew and deterioration. Lints.

Rayon: Absorbs quickly with easy release, however has low water retention making it less effective for general cleaning. Dries fast and is mildew resistant. Cleaner yarn with less linting. Used primarily in special applications such as floor finishing.

Cotton/Synthetic Blend: Combines high-performance with long product life. Cotton fibers provide high water absorption and retention for effective floor drying. Synthetic fibers provide maximum water pick-up and strength for increased product life. No "break-in" required.

CUT-END VS. LOOPED-END MOPS

Cut-End: Most popular, lower purchase prices, and perceived to be more economical. But because cut-end mops cannot be laundered they are often thrown away before their lifespan is complete, making their ultimate cost higher. Fray and unravel with use and have a tendency to leave behind loose strands and lint.

Looped-End: Outlast cut-end mops 8 to 1. Offer more superior performance and last longer than cut-end style mops. Prevent fraying and unraveling resulting in reduced labor costs and lower replacement cost.

BLENDED CUT-END WET MOP

Color-coded cotton/synthetic blend mops combine high-performance with long product life. The cotton fibers provide high water absorption and retention for effective floor drying. Not launderable. 12/case.

BLENDED LOOPED-END WET MOP

Looped-end mops provide superior performance and last longer than cut-end style mops—outlast cut end mops 8 to 1. The cotton/synthetic blended yarn combines high-performance with long product life, and the looped-end prevents fraying and unraveling, resulting in reduced labor costs. Not launderable. 12/case.

HAND PAD

Help reduce cross-contamination by designating these light to medium-duty colored hand pads for use in specific areas. The open web design allows for quick washing and reuse, and the pad conforms to cracks and crevices on the surface to get a deep down clean. Made of 100% virgin nylon fiber, these pads will not rust or splinter. Tan pad made with walnut shells. Easy on hands. 9" L x 6" W x 3/8" thick.

INDUSTRIAL SPRAY NOZZLE

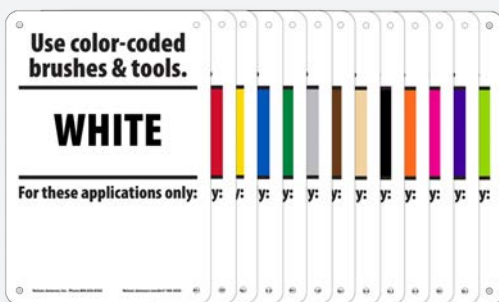

Insulated water nozzles are excellent for industrial use with hot or cold water. Constructed with heat resistant rubber and Santoprene™, they can withstand temperatures up to 180°F. These nozzles are equipped with a rust resistant stainless steel spring and locking clip for continuous spray, and male GHT tip for attaching accessories. A water-saver brass stem provides an adjustable spray pattern with a maximum working pressure of 100 psi. Features an instant shut off trigger release. 3/4" Female GHT inlet.

COLOR-CODED SIGN

Mark your own color-coded areas with 13 individually colored signs. Use a permanent marking pen to customize the wording on these signs to match your plant requirements. High-visibility signs clearly indicate that color-coding systems are in place.

Rigid Plastic 7"W x 10"H							
180-2020 White	180-2021 Red	180-2022 Yellow	180-2023 Blue	180-2024 Green	180-2025 Gray	180-2026 Brown	
180-2027 Tan	180-2028 Black	180-2029 Orange	180-2008 Pink	180-2030 Purple	180-2031 Lime		

TRI-ZONE SIGN

Whatever your system for color-coding, our custom signs can make identification easier. The original Tri-Zone color-coded brush program sign identifies the white (pasteurized product), red (raw product), yellow (cleanup), and black (floor drain only) work zones.

Material Handling

RUBBERMAID® ROUND BRUTE® CONTAINER AND LID

Rugged all-purpose containers built for tough food plant conditions! Brutes feature crush resistant construction to withstand blows that would ruin most others. Use for food products or waste as their seamless design is easy to clean. Add a dolly to convert Brutes to mobile bins (sold separately). Venting channels dramatically reduce the force required to remove a filled can liner by over 50%. **All colors are made of USDA accepted materials that comply with FDA regulations and are NSF Standard 2 Certified. Dome tops and dollies are not NSF certified.**

BRONCO™ ROUND CONTAINER AND LID

NEW & IMPROVED

Heavy-duty with double-reinforced stress ribs and drag skids for ultimate durability in any application. Stackable design for easy storing and integrated bag cinches help hold liners in place. Comfort curve handles on each side allows for easy lifting and prevents vacuum sealing when stacking. Features bottom ergonomic hand holds for efficient emptying. Container base notches securely attach to a wheeled dolly (sold separately). Locking, press-pull lids are designed to prevent water from collecting—reducing the risk of bacteria growth (sold separately).

All colors are NSF 2 and NSF 21 certified for food contact and cleanability.

*Item may be subject to a MOQ.

DON'T FORGET TO ORDER YOUR TRASH CAN LINERS!

Make sure you find the right sized liner for your container! If your liner is too large, and hangs over the side of your trash can, it is wasted money and plastic. A too-small liner will fall into the can.

To learn more, request our Trash Can & Liner Selection Guide.

NEW

AKRO-MILS® STACKABLE STORAGE SHELF BINS

Constructed of durable industrial-grade plastic, these affordable plastic storage bins can be fully loaded without bulging or cracking and multiple divider slots allow for a greater number of storage options. Features built-in rear hang lock, which allows bins to tilt out for complete access, while hooking onto shelf to prevent spills. One-piece construction is waterproof and corrosion-proof making them unaffected by weak acids and alkalis. More sizes available on our website.

SANI-BOX® BULK BIN

Maximize sanitary food handling practices at your plant with the industry's most hygienic bulk container design. Eliminates the sidewall seams, gaps, holes, and other bacteria traps associated with other plastic bulk boxes. A seamless FDA-compliant high-density polyethylene (HDPE) construction has been meticulously configured so liquid residue is unable to pool or collect on any exterior container surface. Standard bin has a drain plug and a self-draining bottom to ensure any leftover interior residue drains completely without workers having to tilt, tip, or dump the container during the cleaning process. Other options include: Without a drain or with runners, please call us for details. Direct ships from manufacturer, freight charges will apply. Other lid colors available upon request. *Minimum order of 10 bins.

ANTIMICROBIAL KNOBBY MAT™

Certified antimicrobial rubber mats designed for heavy wear and tear in almost any environment featuring the same great features as the Knobby Mat™! Knobby surface on both sides allows circulation of air or liquid. Protects stainless steel parts or glassware from knocking against hard surfaces. Manufactured from FDA approved material. Features 3/4" reinforced holes die-cut in 2 corners for easy hanging and a single triangular hole on the bottom end to indicate the mat being antimicrobial. Black "X" on one side helps prevent cross-contamination. Use the solid colored side for product contact and the side with the "X" as the bottom side.

Mat with Hanging Holes and "X" 21" x 27"

COLOR-CODED METAL DETECTABLE PRODUCTS

Providing the benefits of color-coded and metal detectable products in one. Produced from a specially formulated FDA-compliant material, these high-impact polypropylene tools have the ability to be detected by most metal detection machines used in the food processing industry. We have a complete line of metal detectable products available—visit our website to view and download our complete Metal Detectable Flyer!

METAL DETECTABLE SHOVEL

Tough one-piece construction will hold up on the job. The “D” style handle aids in comfort and control, while the smooth finish provides easy clean-up. Made from FDA-compliant polypropylene resin.

METAL DETECTABLE HAND SCRAPER

Remco
a Vikram company

Made from FDA-compliant polypropylene resin, which can be identified by standard metal detection equipment. The strong, seamless construction ensures there are no areas to harbor bacteria, while the handle features a thumb indentation for stronger grip and control. Works well for pans, vats, tables, or countertops. Working temperature range: -22° to 176°F (-30° to 80°C).

METAL DETECTABLE RETRACTABLE HD PENS

Slightly textured finish is suitable for most food-related environments. This standard ink pen performs well in ambient working temperatures, and a clean environment. The retractable housing with stainless steel return spring mechanism provides continuous performance. Ink and pen housing are the same color. Refills available (sold separately).

COLOR-CODING IN THE LAB

Color can be an important visual cue in the lab. While some of these products do not fit our traditional definition of "color-coded," we know that their color is helpful to make sure you have the right color for your test or laboratory application.

PLASTIC VIALS

2-oz aseptic, dairy vials are guaranteed leak-proof with a triple seal, and are an economical option for all your sampling and storage needs. Vials meet all USDA dye test requirements, as well as the Federal Milk and Marketing Administration, FDA, and the Pasteurized Milk Ordinance (PMO) standards. Made of food grade, non-toxic polypropylene. Manufactured in an NCIMS listed facility. 600/case. 3-oz and 4-oz colored vials also available.

SWITCH-GRID™ TEST TUBE RACKS WITH COLORED GRIDS

Innovative, split-frame rack holds up to two different size tubes in the same rack and allows users to quickly switch grids to hold other sizes as needed. Each rack frame includes a set of grids in one size. Grid sets in alternate sizes can be purchased separately.

- 10 mm to 30 mm diameter test tubes fit in five color-coded grid inserts.
- Save storage; additional grid size can be purchased separately. No need to purchase several different size racks.
- Three tier rack holds tubes securely in place.
- Chemical resistant polyoxymethylene plastic rack frame and grids can be cleaned with mild detergent, ethanol, or isopropyl alcohol; autoclaved at 121°C (250°F).
- Rubber feet keep racks from sliding on benchtop; provide secure stacking while in storage.
- Rack frame overall dimensions: 12-1/5" x 4-3/8" x 2-5/8".

BRANDTECH® macro™ PIPETTE CONTROLLER

Help prevent cross-contamination in your lab and also keep your instruments in their designated areas by using color-coded instruments. This color-coded pipette controller, available in four colors, is a great option. An ergonomic alternative to rubber pipette bulbs and other manual aspiration devices, the macro pipette controller provides precise one-finger meniscus control. The membrane filter (included) reduces cross-contamination. Accommodates pipets from 0.1 to 200 mL. Fully autoclavable.

GRADUATED NESTING PITCHERS

Lightweight durable pitcher made from polypropylene material. Designed for easy measurement of approximate volumes in the lab, with easy grip handles. They are nesting to conserve space and have blue screened, 10 mL, graduations. Autoclavable at 121°C (2 bar). However, to preserve graduation markings on pitchers, cleaning at no higher than 60°C is recommended. 12/pack.

3M™ SECUREFIT™ H-700 SERIES HARD HAT

Designed to distribute force and increase suspension ease of wear as it self-adjusts to the wearer when the 4-point ratchet is tightened. Accessory slots provide added versatility to accommodate cap mounted earmuffs, headgear, faceshields, and welding helmets (all sold separately). Absorbent brow pad provides comfort and ventilation. Features a Uvicator™ Sensor, which shows when it is time to replace the hard hat due to UV exposure.

NORTH ZONE™ HARD HAT

So comfortable, stable, and lightweight your workers won't want to take it off! Features a suspension with multiple adjustment points so users can customize the fit to suit their own preferences. It enhances fit and balance without the need to overtighten the suspension—ensuring that it stays in place the entire shift. Hard hats have an ergonomic headband, breathable/washable sweatband, easy grip ratchet, removable rear comfort cradle, and a short brim for increased field of vision. Meets ANSI/ISEA Z89.1 2014 Type 1, Class C, G and E.

ENDUROSAF™ PROTECTIVE APRONS

Long-term economy aprons that stand up to harsh food plant conditions. Their secret is Enduro 2000™, a high-tech material that outperforms traditional materials up to 10 to 1. It's stronger, longer-wearing, and exceptionally resistant to abrasion, chemicals, oils, and fats. Built-in memory allows it to return to its original dimensions after stretching or temperature abuse. Endurosaf aprons are lightweight, soft, easy to clean, and remain flexible in extremely cold temperatures. Self-material waist ties and neckstrap with plastic buckle for adjustability. FDA accepted materials. 8 Mil thickness.

TINGLEY BOOT SAVER® SHOE COVERS

Prevent cross-contamination with these high-quality, disposable shoe covers. Made from natural rubber latex, Boot Saver Shoe Covers are highly elastic and easily stretch over primary footwear. Resists a wide range of chemicals and fats, and provides a barrier from liquids and other contaminants. The textured outsole grips on both wet and dry surfaces, while the powder-free finish eliminates concerns about powder contamination. Choose from four colors to meet all your color-coding requirements. Available in sizes medium to 2XL to fit footwear sizes 7 to 15. 100 pair/case.

TINGLEY FLITE™ BOOTS

A revolution in protective footwear—made from EVA material, these boots are 40% lighter compared to most steel toe PVC and rubber knee boots, making them anti-fatigue for wearers. The durable, seamless upper is 100% liquid proof, while the slip resistant, nitrile rubber outsole spits out debris for slip resistance on dry, wet, and contaminated surfaces. Features a 15" height with Calf-Relief Topline (CRT™) for roomier calf space and easier on/off, a beveled heel for reduced back and leg strain, and tread wear indicators to show when half the tread has worn away. Superior chemical resistance to fats, oils, hydrocarbons, certain acids, and caustics make Flite an excellent choice for food processing and chemical applications. Available with a Chevron-Plus® Outsole for slip resistance on wet-contaminated surfaces, a Cleated Outsole for grip on indoor and outdoor surfaces or Safety-Loc Outsole for slip resistance on wet, non-contaminated surfaces. Composite safety toe meets ASTM F2413 M I/75 and C/75 EH and will not set off metal detectors.

DUNLOP® FOODPRO PUROFORT® SAFETY BOOTS

DUNLOP
PROTECTIVE FOOTWEAR

A new generation of Purofort boots designed for the food processing industry. These polyurethane steel toe boots feature all the benefits of Purofort technology, in addition to a multigrip outsole that can be used in a multitude of varying slip environments; mainly the semi-solid contaminated areas. Additionally, the outsole of the multigrip is extra dirt-repellent. The FoodPro has been developed in such a way that it stays clean even longer, and the surface of the shaft and design of the boot are extra smooth, making the boot much easier to clean.

FLOOR MARKING SHAPES

Heavy-duty two-ply, 36 mil thick marking shapes withstand scuffs, marks, rips, and shreds in high-traffic floor areas. Use to mark pathways, locations of equipment, and machinery—reducing the maintenance needed to replace standard marking tapes or the downtime to paint.

JANITORIAL SHADOW BOARDS

Keep tools and supplies in their designated locations. Ideal for non-food contact or general maintenance areas. The Pro Series Acrylic was designed for food processing and washdown environments and is antimicrobial. The subsurface ink will not chip, peel, or deteriorate, and is pressure washable. Temperature range of -30° to 190°F.

Each board holds 11-1/2" wide metal dust pan, 11" wide upright lobby dust pan with 25" handle, 48" handle angle broom, 8" flagged counter duster, 24" push broom with 60" handle. Tools sold separately.

Choose from a variety of board/shadow colors:

68"H x 30"W			
180-2522 Red/White	180-2523 Yellow/White	180-2524 Blue/White	180-2525 Green/White
180-2526 Red/Black	180-2527 Yellow/Black	180-2528 Blue/Black	180-2529 Green/Black

WET ZONE AND DRY ZONE SHADOW BOARD

Color-code your cleaning tools to easily designate different zones, shifts, processes, or cleaning purposes for wet and dry environments. Shadow boards create a Critical Control Point in a HACCP Management System, helping to prevent or eliminate food safety hazards or to keep them at a manageable level. The Pro Series Acrylic was designed for food processing and washdown environments and is antimicrobial. The subsurface ink will not chip, peel, or deteriorate, and is pressure washable. Temperature range of -30° to 190°F. Board size 68"H x 30"W.

Wet Zone Shadow Boards (Board Color/Shadow Color)

Each board holds the following Vikan® tools: Tank Brush (pg 15) with 51" Ultra Hygiene Polypropylene Euro-Thread Handle (pg 27), 24" Single Blade Ultra Hygiene Squeegee (pg 29) with 59" Ultra Hygiene Polypropylene Euro-Thread Handle (pg 27), Long Handled Hand Brush (pg 6), Hand Scrub Brush (pg 4), and 3-gallon Flat-Sided Pail (pg 46). Tools sold separately.

Choose from a variety of board/shadow colors:

68"H x 30"W			
180-2549 Red/White	180-2550 Red/Red	180-2551 Red/Blue	180-2552 Red/Black

Wet Zone Boards

Dry Zone Boards

Enhance Your 5S System with Customized Shadow Boards

Shadow boards are an effective way to visually communicate throughout a facility and maintain a successful 5S System.

Features:

- Reduces the time away from the workstation by providing a designated place for specific tools within reach of operatives.
- Incorporate color-coding to keep food-contact, non-food-contact, and allergens in separate zones.
- Improves safety and speeds up processes by extending the life of equipment and eliminating missing tools.

VIKAN® HYGO MOBILE CLEANING STATION

A compact, ergonomically designed cleaning cart offers a comfortable user experience and easy maneuverability. It features a smooth surface finish and rounded edges, eliminating areas for bacteria to harbor. Customizable tool storage on the front and back with easy-mounting tool brackets, capable of holding up to 12 tools with additional components (sold separately). Constructed from EU and FDA food contact-compliant raw materials.

White	Red	Yellow	Blue	Green	Black

We offer the most diverse and extensive collection of color-coded products in the industry.

A complete color-coded system helps promote organization and efficient work flow. Designating critical control areas and zones helps your sanitation program by ensuring that the tools stay in the areas in which they are meant to be used, doing jobs they are meant to do. Color-coded systems also help avoid bacterial and allergen migration within a facility, allowing you to maintain a safe food processing facility.
