Detection of contaminants is a key part of food safety. Increasingly demanding government regulations continue to fuel the importance of using metal detectors and x-ray machines to detect and reject harmful and intrusive objects. These objects can damage equipment, cause injury, or result in a recall if your product has reached the end user. Using metal detectable or x-ray visible items in conjunction with guidelines can drastically reduce the likelihood of anything contaminating your product.

If you use metal detectors or x-ray equipment at your facility, we can help enhance your HACCP and GMP programs with our wide line of metal detectable and x-ray visible products. From safety supplies to processing tools, we can help ensure your product's integrity.

#### X-RAY VISIBLE

X-Ray machines have an advantage over metal detectors in that they can detect a wider range of foreign bodies. As the x-ray passes through the food product, anything in it that is denser than the product will make a change in the detection. There are limitations to what an x-ray machine can detect including plastic (that isn't metal detectable), hair, and insects.

#### **BRC COMPLIANT**

BRC is a globally recognized third party certification program trusted by company's worldwide. BRC has a highly experienced technical team that provides support and answers technical questions. All products from Detectamet are BRCGS compliant.

#### WHY COLOR-CODE?

A complete color-coded system helps promote organization and efficient workflow. Designating critical control areas and zones helps your sanitation program by ensuring that the tools stay in the areas in which they are meant to be used, doing jobs they are meant to do. Color-Coded systems also help avoid bacterial and allergen migration within a facility, allowing you to maintain a safe food processing facility. We have a variety of Color-Coded, Metal Detectable products available throughout this flyer.

#### **GENERAL ENVIRONMENTS**

**Solution:** Detectamet's pens are ergonomically designed for long periods of use.

**Solution:** Cryo pens can write in extreme low temperatures down to -20°C (-4°F) in areas such as cold stores

#### **POWDERED ENVIRONMENTS**

**Solution:** Detectamet has developed a cryo pen that avoids clogging up and will continue to write. This is most useful in mills and bakeries.

#### **CHILLED ENVIRONMENTS**

**Solution:** We have gel and cryo pens that works in low temperatures ideal for use in chilled areas.

#### WET/DAMP ENVIRONMENTS

**Solution:** The specially developed Detectamet cryo ink refill that won't smear when used in damp areas.

#### **ENCLOSED ENVIRONMENTS**

**Solution:** For tight environments you need a pen that can write at unusual angles which our cryo pens can achieve.

#### **REFILLABLE**

This pen can be refilled from our ink selection.

Detectamet's metal detectable pens are produced from a specially formulated food contact approved polymer that combines metal and x-ray detectablility. The pen bodies are flexible and shatterproof making them ideal for use in food processing plants to help achieve safety and compliance.

Choosing a pen is dependent on the type of facility you have. To make this choice easier, we have included icons in our flyer that correlate to the type of facility each ink will work best in. Using the icons on the left, you can match your plant's environment to the pen(s) that will work best for you.

You will also notice for each pen, whether it can be refilled using one of our refillable pen cartridges. Refilling your pens is a great way to save money and time by having a new ink cartridge ready when you need it.

#### **OPTIONAL COLORS AVAILABLE:**

Not available for all pen configurations, call us for details.

#### **Pen Housing Colors:**

# ECONOMY RETRACTABLE PEN

• Designed to satisfy the basic requirements for performance and detectability by metal and x-ray monitoring systems used in the food industry.

 Produced with a food contrast blue plastic shell.

· Choose red, blue, green, or black ink in a standard cartridge.

• The color of the end cap matches the ink.

· Ridges at the point of grip to make pen easier to hold firmly in wet and greasy work environments or with gloved hands.

Pens are 50/box.

Ink refills are 100/box.

364-7191	HD Stainless Steel	EA

Any plastic clipboard can be customized by choosing from a range of colors, clips, ring binder mechanisms and hanging hooks. Call us for details.

Personalize your clipboard or clips by having your company name or sequential numbers engraved. Call us for details.

Detectamet

#### CLIPBOARD CLIP

- Made from stainless steel, chrome, or zinc plated steel.
- Durable and lightweight.

Stock #	Description	Unit
364-7043	HD Stainless Steel Clip—2.75" x 5.75"	EA
364-7186	Stainless Steel Economy Clip—1.25" x 4.75"	EA
364-7194	Chrome Plated Economy Clip—1.25" x 4.75"	EA
364-7199	Zinc Plated Pen Holder Clip—1.25" x 4.75"	EA

#### **MAGNETIC CLIPBOARD**

- Lightweight.
- Portrait orientation.
- Chrome Plated Economy Clip, other clips available upon request.
- Clip color matches the color of the clipboard.
- Strong magnets on back of board.
- Other sizes and clip options available. Call for details.

#### RUBBER KNOBBY MAT<sup>TM</sup>

- Knobby surface on both sides to allow for circulation of air or liquid.
- Mat with "X" helps prevent crosscontamination—use solid colored side for product contact.
- Formulated of FDA approved materials.
- Features (3) 0.75" die-cut hanging holes for use with stainless steel mat hanger (141-2200).
- 21" x 27".

Stock #	Color	Unit
141-2080	White with No "X"	EA
141-2081	Black with No "X"	EA

#### **DELRIN METAL DETECTOR TEST ROD**

- Made of virtually indestructible plastic material called delrin.
- Use to calibrate your metal detector.
- Rods are red (ferrous), green (non-ferrous), and blue (316 stainless steel) for easy identification.
- 0.375" square x 6"L.

# **METAL DETECTOR TEST BALL**

- Made of virtually indestructible plastic material called delrin.
- Use to calibrate your metal detector.
- Balls are red (ferrous), green (non-ferrous), and blue (316 stainless steel) for easy identification.
- The high-grade certified metal spheres are completely sealed within the ball.
- 1" diameter.

# ACETAL METAL DETECTOR TEST CARD

- Compact design of these test cards makes them ideal in many applications.
- Double-sided.
- Certified metal spheres are completely sealed within the card.
- Cards are red (ferrous), green (non-ferrous), and blue (316 stainless steel) for easy identification.
- 2.125"W x 3.375"L

## What is the Smallest Piece of Foreign Object that can be Detected by a Metal Detector?

This answer varies greatly. It is dependent upon the material of the contaminant itself, the speed of the line and the moisture content. The height of the detector head from the line is the most critical variable, as sensitivity decreases as height increases.

# **How do you Maintain Calibration?**

You want to periodically check calibration by passing a known calibration test tool under the unit to check for accuracy. These can be made of ferrous, non-ferrous, or stainless steel, and come in the form of rods, cylinders, balls, whips, cards, and more.

# **How do you Adjust your Metal Detectors?**

Machines must be calibrated to the food they are processing and then set to a threshold, determined by the company in regards to the size of the contaminant they want the detector to reject. The type of product passing through the detector (wet or dry), its size, and speed affect the setting. The metal detector manufacturer can assist with calibration setup.

# What Happens if you Don't Test your Calibration?

The metal detector can allow larger pieces of foreign contaminant to get through compared to the threshold setting threatening the finished product's safety.

# **NEED A NEW METAL DETECTOR OR PARTS?**

Give us a call! We can assist with standard and custom metal detection solutions.

#### X-RAY VISIBLE!

#### **DETECTABLE BRUSHES AND BROOMS**

Fully metal detectable, x-ray visible and food grade. These brushes and brooms were created to be durable, resistant, easy to clean, and ergonomic. Autoclavable at 270°F.

# **POLY-SS & POLY-SS-XR CLAMP GASKET**

- Poly-SS gaskets blend PTFE barium and stainless steel to make a super strong, long lasting gasket.
- Choose regular metal detectable (gray Poly-SS), or metal detectable/x-ray detectable (blue Poly-SS-XR).
- Chemical resistant.
- Working Temperature -320° to 550°F.

Other metal detectable/x-ray visible products include O-Rings, orifice gaskets, screen gaskets, John Perry, I-line, bevel seat gaskets, and custom sheets in a variety of colors, sizes and thicknesses.

Call our process systems department for details.

#### **LKH PUMP SEAL KIT**

- OEM Alfa Laval metal detectable shaft seal.
- Made of metal detectable EPDM elastomers.
- Includes (1) stationary seal ring, (1) o-ring for stationary, (1) rotary seal ring, and (1) o-ring for rotary.
- Metal detectable EPDM service kits LKH pumps also available.

Stock #	Fits	Materials

## **COMBICUTTER**

- Designed to cut with absolute safety and efficiency.
- Includes an integrated tape slitter.
- . Available in 2 versions: easy tool free blade change or with locking blade cover that requires a special tool (445-2053) to access the blade (sold separately).

Stock #	Color	Unit
445-2144	Blue	EA

**MARTOR**°USA

#### LIGHT-DUTY PACKAGING CUTTER

- Reduce the risk of accident through blade changing by using this light-duty fixed blade cutter.
- Body is made of impact resistant, metal detectable polypropylene for durability.
- Pointed nose allows for insertion of the cutter into all types of paper and plastic.
- Non-replaceable stainless steel blade.

Stock #	Color	Unit
364-2408	Red	ВХ
364-2409	Yellow	BX
364-2411	Blue	ВХ
364-2412	Green	ВХ

#### **HEAVY-DUTY PACKAGING CUTTER**

· Heavy-duty fixed blade cutter, reduces the risk of accidents by eliminating blade change.

- Body is made of impact resistant, metal detectable polypropylene for durability.
- Integrated tape slitter safely cuts packaging tape without an exposed blade.
- Pointed nose allows for insertion of the cutter into all types of paper and plastic.

Stock #	Color	Unit	
364-2413	Red	ВХ	
364-2414	Yellow	EA	
364-2415	Blue	BX	
364-2416	Green	BX	

#### RETRACTABLE SAFETY KNIFE

• Blade locks in the 'out' position while a controlled cut is being made. If the knife is jerked, shaken or dropped, the blade will retract.

- Blade lock control for safe storage.
- Easy blade change.
- SS straight replacement blades are 10/pack.

Stock #	Description	Unit
364-2638	Safety Knife with Plastic Blade Carrier	EA
364-2639	Safety Knife with Aluminum Blade Carrier	EA
364-2648	Replacement SS Straight Blade	PK

# SAFETY KNIFE WITH RETRACTABLE HOOK BLADE

• Stainless steel blade is molded into the metal detectable plastic.

 Patented 'opposed exits' at the back of the blade.

· Spring loaded auto retractable hook blade.

Stock #	Unit
364-2643	ВХ

- Disposable, ambidextrous, spring-loaded safety knife.
- Designed specifically for packaging materials.
- Non-replaceable stainless steel blade.

Stock #	Description	Unit
445-2054	4"L Safety Knife	EA

MARTOR°USA

#### **RETRACTABLE SAFETY KNIFE**

- Blade locks in the 'out' position while a controlled cut is being made.
- Blade retracts once contact with cutting surface is lost.
- Easy blade change—just slide the blade mount insert back.
- Replacement blades are 100/box.

Stock #	Description	Unit
445-2019	Stainless Steel/Blue Self Retracting	EA
445-2016	Stainless Steel Blades	ВХ

#### **BAG CUTTER**

- Specifically designed to cut multilayer paper or plastic.
- · Molded in stainless steel blade for added safety.
- Patented opposed slopes at the back of the blade reduce friction resistance which enables a smooth and more effective cut.

Stock #	Color	Unit
364-2430	Blue	ВХ

#### **HEAVY-DUTY SAFETY KNIFF**

• Unique patented valley guides the material to be cut directly along the surgical steel blade taking the strain off the operator.

- Easy to clean.
- Suitable for cutting cable ties, rope, string, and netting.
- SS straight replacement blades are 10/pack.

Detectamet

#### **BOX CUTTER WITH HOOK BLADE**

- Automatic spring-loaded finger guards protect and retract when cutting, leaving only the blunt edge of the hook blade exposed when knife is not in use.
- Hook blade punctures the box and prevents damage to contents.
- Straight blade cuts conventionally at a 45° angle.
- Thumb grip for superior control.
- Internal storage for new and used blades.
- Replacement blades are 10/pack.

Stock #	Description	Unit
364-2634	Box Cutter	EA

#### **UNDERSTANDING METAL DETECTORS**

There are three versions of metal detectors—tunnel (typical for cheese), pipeline (for fluid products), and free fall (for powders). Detectronics makes sanitary designed metal detectors suitable for the wash down environment in Cheese and Protein Processing. Replacement metal detector heads available for most existing MD conveyors. The latest version features color HMI with flexible user programming.

- Tough and robust structure of stainless steel.
- Cost effective and extreme reliability.
- Hygienic design and compliant with IP67/IP69K/NEMA4.
- Digital signal processing with very sensitive software.
- Low false reject rate due to ESP signal processing system.
- Modular conveyor belt integrated with metal detector and reject systems.
- Full compliance with HACCP criteria.
- Can be equipped to meet e.g. IFS, BRC, M&S requirements.
- DETECTRONIC uses only food-compatible parts that are FDA & USDA compliant.
- Variable speed drive as standard.
- · High level of electronic and echanical reliability.
- Worldwide installations.
- Made in Denmark.

# **Cheese Inspection and Contaminant Detection Systems**

Nelson-Jameson is proud to partner with Valcour Process Technologies to provide our customers with the equipment needed to inspect a wide assortment of product to prevent contamination. The Shield Allegro is a powerful x-ray inspection system that provides a higher level of inspection over traditional metal detectors.

While metal detectors provide reliable and robust contaminant detection technology, x-ray inspection technology helps to ensure improved product quality by providing these additional benefits:

- Designed to inspect a wide assortment of packages up to 450 mm (17.7") wide and 254 mm (10") high.
   Products are typically inspected after packaging but can be inspected as raw product or packaged in a box.
- Detects smaller sizes of stainless steel (2-2.5 mm vs. 6-8 mm), as well as a variety of other contaminants that aren't possible with a metal detector.
- Easy to use, 17" touch screen display provides a digital trail of images for each product scanned should you need to further investigate customer complaints.
- Features an optional 3-A design, software switchable detector resolution, and 24/7 remote technical support.
- Meets the rigorous quality, reliability, sanitary and capability expectations of the U.S. and Canadian Cheese Production & Converting Markets.
- Developed and made in the USA.

# 3MTM E-A-RTM ULTRAFITTM **EARPLUGS**

- Proprietary, premolded, triple-flange design fits comfortably in most ear canals.
- Hypoallergenic polymer is washable/reusable.
- Stainless steel ball bearing embedded into the plug and an impregnated cord.
- NRR: 25.
- 100 pair/box.

Stock #	Description	Unit
196-2075	Plugs with cord	PR

# 3M™ E-A-R™ EXPRESS™ POD PLUGS™ EARPLUGS

- Advanced "no-roll" yellow foam tips and blue paddle-style grips to make getting a good fit easier.
- Stainless steel ball bearing embedded into the plug and an impregnated cord.
- NRR: 25.
- 100 pair/box.

Stock #	Description	Unit
196-2072	Plugs with cord	PR

# • Soft polyurethane foam tips and blue stem makes fitting and removal easy.

3M<sup>TM</sup> E-A-R<sup>TM</sup> PUSH-INS<sup>TM</sup> EARPLUGS

- Stainless steel ball imbedded in plug and an impregnated cord.
- NRR: 28.
- 200 pair/box.

Stock #	Description	Unit
196-2062	Plugs with cord	ВХ

#### EXPAND-A-BAND HEARING PROTECTOR

- Adjustable headband and silicone ear pieces are 100% metal detectable and x-ray visible.
- Accommodates different head sizes with comfort.

Stock #	Description	Unit
364-7031	Band	EA
364-7033	Replacement tips	CA

# **JACKSON SAFETY\* H20 EARPLUGS**

- Thick stem for easy insertion/removal.
- Three soft flanges conform to the ear canal.
- Metal is embedded in the blue plug.
- NRR: 26.
- 100 pair/box.

Stock #	Description	Unit
371-2745	Plugs with cord	ВХ

#### X-RAY VISIBLE!

#### **3 FLANGE EARPLUGS**

- Hygienic silicone is washable/reusable.
- Blue plug and cord are 100% metal detectable and x-ray visible.
- 100 pair/box.

- Stainless steel ball imbedded in plug and an impregnated cord.
- NRR: 32.
- 200 pair/box.

Stock #	Description	Unit	
196-2045	Plugs with cord	ВХ	

# HOWARD LEIGHT™ LASERTRAK® EARPLUGS

- Bright orange and blue plug with metal grommet.
- Blue vinyl cord.
- NRR: 32.
- 100 pair/box.

Stock #	Description	Unit
197-2510	Plugs with cord	вх

#### 3MTM E-A-RTM CLASSICTM EARPLUGS

- Constructed from slow-recovery, low-pressure foam.
- Stainless steel ball imbedded in the plug and an impregnated cord.
- NRR: 33.
- 200 pair/box.

Stock #	Description	Unit
196-2018	Plugs with cord	ВХ

#### JACKSON SAFETY\* H10 DISPOSABLE EARPLUGS

- · Soft, bullet-shaped roll down foam blue earplugs.
- Metal is embedded in the earplug for quick detection.
- NRR: 31.
- 100 pair/box.

JACKSON*	
CHUNC	

Stock #	Description	Unit
371-2735	Plugs with cord	ВХ

# 3M™ E-A-RSOFT™ SUPERFIT™ EARPLUGS

- Features the proprietary SuperFit fitting ring to help insure proper fit.
- Stainless steel ball bearing imbedded into the plug and impregnated cord.
- NRR: 32.
- 200 pair/box.

Stock #	Description	Unit
196-2019	Plugs with cord	ВХ

# What is a NRR Rating?

Noise Reduction Rating is the measurement, in decibels, of how well a hearing protector reduces noise. The higher the number, the greater the protection.

## Why Blue?

Many metal detectable products are colored blue for two reasons:

- 1. Easy visual detection
- 2. It is the most common non-food color.

# What is the Difference Between Embedded Metal and Impregnated Material?

A product with embedded metal is only detectable if the product piece containing the metal goes through a detector. With a product that is impregnated, the entire piece has fine metal particles throughout, making the entire piece, or parts of it, detectable.

#### **DISPOSABLE EARPLUGS**

- Fully detectable and x-ray visible, these corded earplugs feature a metal insert inside the foam plug and cord.
- The soft roll-down foam allows for easy insertion, and is free from latex, silicone, and phthalates.
- NRR: 32.
- 250 pair/box.

Stock #	Description	Unit

## **What Makes Products Metal Detectable?**

In plastic products such as scrapers, pens, and vinyl gloves, a unique manufacturing process involving the inclusion of a metallic pigment enables the plastic to be detected. In other products such as earplugs, a stainless steel ball bearing is enclosed in the plug to make them detectable.
